Investment strategy

A responsible selection of French equities based on proprietary ESG analysis

Sycamore Francecap aims to outperform its benchmark index, the CAC All-Tradable NR, over a period of five years, through a multi-thematic and socially responsible investment process drawing from our proprietary "SPICE" methodology and economic and societal contribution indicators. The fund invests without sector or market capitalisation constraints in French equities we believe to be trading at a substantial discount. Depending on the manager's forecasts, a significant portion may be allocated to mid-caps.

Performance as of 29.12.2023

	Dec	2023	1 year	3 yrs	5 yrs	Inc.*	Annu.	2022	2021	2020	2019

Fund commentary

After rising in November, markets remained upbeat in December as the Fed took a much more accommodative tone on the back of the constructive inflation data published recently. In a risk-on environment, the fund benefited from its over-exposure to small and mid-caps (active weight 41%, contributing +1.2%), cyclical industrials (active weight 7%, contribution +2.0%) notably via positions in Saint-Gobain, Verallia, Rexel and Nexans, and to technology (active weight 7%, contributing +0.4%) via positions in Worldline (despite the stock's exit from the CAC40 index after the December reshuffle) and Alten. Another highlight in December was the bid on Chargeurs launched by its CEO, who already owns 27% of the capital, at a price of €12 - a 34% premium over the last closing price.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

Sycomore AM does not guarantee the accuracy, completeness, and exhaustiveness of the extra-financial reports.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 26%

ESG follow-up, news and dialogue

Dialogue and engagement

Sanofi

During our meeting with the company we discussed recent announcements, including the increase of the R&D budget and plans to spin-off its consumer health business with a separate listing in France, following the appointment of a new Chairman of the Board. Management also shared with us the results of the most recent social barometer, which shows a rise in the employee engagement score.

ESG controversies

Sanofi

On December 6th, Sanofi announced that the Mourenx facility, which produces Dépakine, had been shut down between 15-18 November due to toxic waste emissions exceeding the norms. The necessary works have since been conducted and emissions on the site are no longer above the norm. Since August 2022, a judge from the public health division of the Paris judiciary has been investigating the toxic emissions produced by this factory up until 2018, when work was completed to ensure compliance.

Votes

1/1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Alfen

We had asked the company to submit its greenhouse gas emission reduction targets to SBTi. Alfen has now confirmed that these targets have been submitted for future certification.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. This information has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Sycomore AM is not banned from trading on these securities prior to the dissemination of this information. Before investing, please read the fund's KIID available on our website: www.sycomore-am.com.

Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Inception	1.0	0.8	1.7%	16.3%	18.9%	5.9%	0.4	0.1	-35.1%	-37.9%

Fund commentary

Eurozone equity markets continued to rebound, ending the year close to their all-time highs. Investors are increasingly confident in a dovish pivot before long, both in Europe and in the US (which would add to the likelihood of a soft-landing for the global economy). Cyclical growth stocks therefore outperformed by a large margin and enabled the fund to deliver a robust performance in December. Top contributors to performance included industrials (Prysmian and Siemens), cyclical consumer spending (Brunello Cucinelli and Technogym), and semiconductors (ASML and more recently AMD). In terms of portfolio activity, we added a new position in Renault (favourable product cycle and expected credit rating upgrade) and trimmed our exposure to Merck Kgaa (disappointment over the pharma portfolio).

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 21%

ESG follow-up, news and dialogue

Dialogue and engagement

Sanofi

During our meeting with the company we discussed recent announcements, including the increase of the R&D budget and plans to spin-off its consumer health business with a separate listing in France, following the appointment of a new Chairman of the Board. Management also shared with us the results of the most recent social barometer, which shows a rise in the employee engagement score.

Deutsche Telekom

We recently met DT's management who gave us a very interesting insight on its ESG strategy. The group targets to reduce scope 1-3 emissions by 55% by 2030, from 2020, to be net zero emissions by 2040 and fully circular around technology and devices by 2030. We also discussed DT's strategy on cybersecurity. On the people side, we discussed the potential impact of AI on the company's workforce and started an engagement on the disclosure of the company's global gender pay gap.

ESG controversies

Novo Nordisk

The group has recently been accused of failing to disclose side effects of Ozempic in Canada. Several patients have reported experiencing severe gastrointestinal or gall bladder-related issues following the use of the drug. There were already similar complaints in the US and in the UK. Ozempic is currently reviewed by The British Medicines and Healthcare Products Regulatory Agency (MHRA) after reports of suicidal and self-harming thoughts.

Sanofi

On December 6th, Sanofi announced that the Mourenx facility, which produces Dépakine, had been shut down between 15-18 November due to toxic waste emissions exceeding the norms. The necessary works have since been conducted and emissions on the site are no longer above the norm. Since August 2022, a judge from the public health division of the Paris judiciary has been investigating the toxic emissions produced by this factory up until 2018, when work was completed to ensure compliance.

Votes

1 / 1 voted general assembly over the month.

A responsible selection of mid-caps

Sycamore Sélection Midcap seeks to outperform the MSCI EMU Smid Cap Net Return index (dividends reinvested) by employing a socially responsible and multi-themed investment process (energy transition, healthcare, nutrition, well-being, digital...) in keeping with the United Nations' Sustainable Development Goals (SDGs). Primarily exposed to EU country equities, the fund specifically targets the mid-cap segment, with no sector constraints. Our ESG exclusion and selection methodology is fully integrated into our corporate fundamental analysis framework.

Performance as of 29.12.2023

08/20*	1.0	1.0	0.9%	18.1%	16.7%	5.4%	0.4	0.2	-30.2%	-27.9%

Fund commentary

The year ended on a negative note for small and mid-caps in the Eurozone after the segment underperformed once more, lagging large caps by around 10 bp. Positive signals had nevertheless been observed over the last two months, with the continued retreat in sovereign yields and brighter macro-economic data. This environment is particularly favourable to the segment and is likely to persist over the near-term. During the period and since midcaps rebounded in October, the fund has largely outperformed its benchmark thanks to the rerating of undervalued stocks (Ipsos, Tokmanni), companies exposed to renewable energy (ERG, Solaria, Deme), and robust earnings publications (Virbac and Sesa). Virbac has upped its topline and operating margin guidance for the second time this year, on the back of an improved momentum on the animal health market and lower than expected R&D expenditure.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 27%

ESG follow-up, news and dialogue

Dialogue and engagement

Alfen

We had asked the company to submit its greenhouse gas emission reduction targets to SBTi. Alfen has now confirmed that these targets have been submitted for future certification.

ESG controversies

Puma

In December 2023, a report from the University of Sheffield Hallam alleged that Puma and several other brands were still exposed to Uyghur forced labour through their supply chain. Puma has already responded to these allegations, denying any business relationship with the mentioned suppliers in Xinjiang, and any sourcing of cotton from the region. We had already contacted the company for supply chain concerns in Cambodia last month and have included this new report in our discussion items.

Fund commentary

The year ended on a negative note for small caps in the Eurozone after the segment underperformed once more, lagging large caps by around 8 bp. Positive signals had nevertheless been observed over the last two months, with the continued retreat in sovereign yields and brighter macro-economic data. This environment is particularly favourable to the segment and is likely to persist in the near-term, driven by the gradual return of flows and a rebound in M&A activity. During the month, bids were launched on two portfolio holdings, SII and Chargeurs, offering attractive premiums (> 30%) that however fail to reflect these companies' potential over the mid-term. Both announcements contributed positively to the fund's performance. Generally speaking, the current environment is positive for the IT sector. Sesa, for example, reported a healthy turnover (+13% during the last quarter) and expects market dynamics to accelerate in 2024.

A European selection of companies supporting the environmental transition

Sycamore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Inception	0.9	0.9	0.8%	16.9%	16.6%	7.9%	0.4	0.0	-34.2%	-35.3%

Fund commentary

The fund ended the year in slight positive territory but lagged the European market by a significant margin. The fund's 20% rebound over the past two months suggests that the theme has begun a re-rating now that the interest rate environment is more conducive. In addition to the improving macroeconomic factors, the value chains within renewables and the environmental transition are heading towards a better equilibrium: the robust momentum on orders for onshore wind farms is back - as demonstrated by the recent performance of Vestas, the market for solar equipment suppliers (Nexttracker) is vigorous, and capital is being deployed across the electric grid, offering attractive yields (such as Elia). While the comings and goings in European policy fuelled concern for the theme in 2023, the COP28 has marked the "beginning of the end" for fossil fuels and is spurring on the transition.

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données de 2018 à 2021.

Greenfin Breakdown**

Companies breakdown according to their revenue generated by eco and excluded activities defined by [the Greenfin label](https://www.greenfinlabel.com)

Temperature rising - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.
Coverage rate : fund 81%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.
Coverage rate : fund 98% / index 99%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy
Coverage rate : fund 99% / index 99%

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Biodiversity footprint

Artificialised surface area in m² MSA per k€ invested***, measured by the Corporate Biodiversity Footprint. Mean Species Abundance (MSA) is assessed in comparison with the original state of the environment.

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.
Coverage rate : fund 99% / index 77%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).
Coverage rate : fund 98% / index 98%

Sources: company data, Sycomore AM, Trucost, Bloomberg, Science Based Targets, Vigeo. Methodologies and approaches may differ between issuers and providers of extra-financial data. Sycomore AM does not guarantee the accuracy, completeness, and exhaustiveness of the extra-financial reports.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

ESG follow-up, news and dialogue

Dialogue and engagement

STMicroelectronics

We continued our dialogue with STM on the environmental impact of its activities (PFAS, water) and encouraged the company to communicate more transparently on the percentage of income that contributes positively to society and to environment, to highlight these initiatives. In the context of our engagement dialogue on diversity with the Club 30%, STM also provided more information on how it calculates the adjusted wage gap. The company plans to publish a non-adjusted indicator in 2025.

ESG controversies

Alstom

The European Metropolis of Lille is taking legal action against Alstom over delivery setbacks that will cause 10-year delays to the modernisation of the city's underground system. Though we believe the financial risk is limited, the Court may order Alstom to fulfil its contractual obligations. Reputation risk is high as other entities could use the case-law to take legal action against the company.

Votes

1/1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Alfen

We had asked the company to submit its greenhouse gas emission reduction targets to SBTi. Alfen has now confirmed that these targets have been submitted for future certification.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. This information has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Sycomore AM is not banned from trading on these securities prior to the dissemination of this information. Before investing, please read the fund's KIID available on our website: www.sycomore-am.com.

A global selection of companies supporting the environmental transition

Sycamore Global Eco Solutions invests in international listed companies across the entire market capitalization spectrum. The fund focuses on companies with business models that contribute to the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Performance as of 29.12.2023

	Dec	2023	1 year	Inc.	Annu.	2022
Fund %	6.1	-2.2	-2.2	-14.5	-7.5	-13.9
Index %	3.5	18.1	18.1	4.3	2.1	-13.0

Inception	0.8	1.0	-9.4%	16.9%	14.5%	9.7%	-0.5	-1.0	-27.9%	-16.3%

Fund commentary

The fund ended the year close to zero, lagging the global equity market by a significant margin. The fund's 15% rebound over the past two months suggests that the theme has begun a re-rating now that the interest rate environment is more conducive. In addition to the improving macroeconomic factors, the value chains within renewables and the environmental transition are heading towards a better equilibrium: the robust momentum on orders for onshore wind farms is back - as demonstrated by the recent performance of Vestas, the market for solar equipment suppliers (Nexttracker and Shoals) is vigorous, and the monetisation of tax credits from the Inflation Reduction Act in the United States has been initiated (announcements made by First Solar). While the US elections will certainly feed debate around the theme in 2024, the COP28 has marked the "beginning of the end" for fossil fuels and is spurring on the transition.

Investment strategy

A responsible selection of people-driven European companies

Sycamore Europe Happy@Work invests in European companies that pay particular attention to the importance of human capital as a key performance driver. The fund seeks to contribute positively to the human capital issues highlighted in the United Nations' Sustainable Development Goals. Stocks are selected on the basis of rigorous fundamental analysis combined with in-depth ESG research, focusing on a company's ability to promote employee fulfillment and engagement, using a proprietary assessment framework. The analysis draws from the experience and knowledge of field experts, human capital managers and employees. Fund managers also carry out on-site visits. The fund seeks to outperform the Euro Stoxx TR index over 5 years.

Performance as of 29.12.2023

Past performances do not guarantee future performances. (Source: Sycamore AM, Bloomberg)

	Dec	2023	1 year	3 yrs	5 yrs	Inc.	Annu.	2022	2021	2020	2019
Fund %	3.5	15.1	15.1	7.6	50.5	72.0	6.6	-19.0	15.5	13.0	23.8

Inception	0.9	0.7	1.9%	14.9%	18.4%	7.5%	0.4	0.1	-31.4%	-37.9%

Fund commentary

In December, most equity indexes posted positive returns on the back of improving economic data. The change in tone from the FED and the expectation of rate cuts in 2024 on the second week of the month, had an impact on sector allocation with small cap outperforming large cap in US and Europe for the first time in 2023. During the month, the strategy slightly outperformed its benchmark. In terms of asset allocation, the overweight on industrial and technology both contributed positively while the underweight on consumer discretionary detracted from performance. EDPR (Renewables), Prysmian (Italian industrial) and ASML (semi-equipment) contributed positively while some of the year-to-date's outperformers took pause like Munich Re (European re-insurer) and RELX (data provider). We reduced our position on DT (German telecommunication) and we increased our exposure in renewables and luxury.

Sustainable development goals exposure

ESG follow-up, news and dialogue

Dialogue and engagement

Hermès

We continued our collaborative engagement dialogue on human rights with Hermès via the Know the Chain initiative. Among the issues raised: Hermès has pulled out of Russia, all employees wishing to remain within the group have joined other branches and the company no longer exports products to the country. We continue to encourage the company to improve transparency on commodities (country by country, beyond Tier 1). We expect improvements in this area in early 2024.

ESG controversies

Puma

In December 2023, a report from the University of Sheffield Hallam alleged that Puma and several other brands were still exposed to Uyghur forced labour through their supply chain. Puma has already responded to these allegations, denying any business relationship with the mentioned suppliers in Xinjiang, and any sourcing of cotton from the region. We had already contacted the company for supply chain concerns in Cambodia last month and have included this new report in our discussion items.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Deutsche Telekom

We recently met DT's management who gave us a very interesting insight on its ESG strategy. The group targets to reduce scope 1-3 emissions by 55% by 2030, from 2020, to be net zero emissions by 2040 and fully circular around technology and devices by 2030. We also discussed DT's strategy on cybersecurity. On the people side, we discussed the potential impact of AI on the company's workforce and started an engagement on the disclosure of the company's global gender pay gap.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. This information has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Sycomore AM is not banned from trading on these securities prior to the dissemination of this information. Before investing, please read the fund's KIID available on our website: www.sycomore-am.com.

Fund commentary

In December, most equity indexes posted positive returns on the back of improving economic data. The change in tone from the FED and the expectation of rate cuts in 2024 on the second week of the month, had an impact on sector allocation with small cap outperforming large cap in US and Europe for the first time in 2023. During the month, the strategy slightly underperformed its benchmark. In terms of asset allocation, the overweight on industrial and technology both contributed positively while the underweight on consumer discretionary detracted from performance. United Rentals (US industrial), Brunello Cuccinelli (Italian luxury) and ASML (semi-equipment) had a positive impact on performance while some of the year-to-date's outperformers took a pause like Microsoft and Progressive (US insurance). We reduced our position in Progressive where the upside is now more limited, and we increased our exposure in luxury.

ESG follow-up, news and dialogue

Dialogue and engagement

Hermès

We continued our collaborative engagement dialogue on human rights with Hermès via the Know the Chain initiative. Among the issues raised: Hermès has pulled out of Russia, all employees wishing to remain within the group have joined other branches and the company no longer exports products to the country. We continue to encourage the company to improve transparency on commodities (country by country, beyond Tier 1). We expect improvements in this area in early 2024.

ESG controversies

Puma

In December 2023, a report from the University of Sheffield Hallam alleged that Puma and several other brands were still exposed to Uyghur forced labour through their supply chain. Puma has already responded to these allegations, denying any business relationship with the mentioned suppliers in Xinjiang, and any sourcing of cotton from the region. We had already contacted the company for supply chain concerns in Cambodia last month and have included this new report in our discussion items.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

STMicroelectronics

We continued our dialogue with STM on the environmental impact of its activities (PFAS, water) and encouraged the company to communicate more transparently on the percentage of income that contributes positively to society and to environment, to highlight these initiatives. In the context of our engagement dialogue on diversity with the Club 30%, STM also provided more information on how it calculates the adjusted wage gap. The company plans to publish a non-adjusted indicator in 2025.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. Investment strategy

A selection of growth securities with a positive societal impact

Sycamore Social Impact is a Eurozone equity fund that focuses on companies of any size that offer solutions to global societal challenges, and that have embedded this pursuit of positive impacts into their strategy to deliver profitable and sustainable growth. The fund aims to outperform the benchmark, the Euro Stoxx Total Return index, through a socially responsible investment process. Stock selection is based on our proprietary SPICE methodology, notably on the societal contribution of products & services indicator.

Fund commentary

In December, most equity indexes posted positive returns on the back of improving economic data. The change in tone from the FED and the expectation of rate cuts in 2024 on the second week of the month, had an impact on sector allocation with small cap outperforming large cap in US and Europe for the first time in 2023. During the month, the strategy slightly underperformed its benchmark. In terms of asset allocation, the overweight on industrial and technology both contributed positively while the large overweight on health care detracted from performance. Siemens (Industrial), Prysmian (Italian industrial) and ASML (semi-equipment) contributed positively while some of the year-to-date's winners like Munich Re (European re-insurer), SAP (Software) contributed negatively. The performance of the health care sector was impacted by the failure of a late-stage trials of one of Merck Kgaa's drugs that led the stock to underperform during the month.

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KIID available on our www.sycamore-am.com website.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

ESG follow-up, news and dialogue

Dialogue and engagement

Sanofi

During our meeting with the company we discussed recent announcements, including the increase of the R&D budget and plans to spin-off its consumer health business with a separate listing in France, following the appointment of a new Chairman of the Board. Management also shared with us the results of the most recent social barometer, which shows a rise in the employee engagement score.

Deutsche Telekom

We recently met DT's management who gave us a very interesting insight on its ESG strategy. The group targets to reduce scope 1-3 emissions by 55% by 2030, from 2020, to be net zero emissions by 2040 and fully circular around technology and devices by 2030. We also discussed DT's strategy on cybersecurity. On the people side, we discussed the potential impact of AI on the company's workforce and started an engagement on the disclosure of the company's global gender pay gap.

ESG controversies

Novo Nordisk

The group has recently been accused of failing to disclose side effects of Ozempic in Canada. Several patients have reported experiencing severe gastrointestinal or gall bladder-related issues following the use of the drug. There were already similar complaints in the US and in the UK. Ozempic is currently reviewed by The British Medicines and Healthcare Products Regulatory Agency (MHRA) after reports of suicidal and self-harming thoughts.

Sanofi

On December 6th, Sanofi announced that the Mourenx facility, which produces Dépakine, had been shut down between 15-18 November due to toxic waste emissions exceeding the norms. The necessary works have since been conducted and emissions on the site are no longer above the norm. Since August 2022, a judge from the public health division of the Paris judiciary has been investigating the toxic emissions produced by this factory up until 2018, when work was completed to ensure compliance.

Votes

1 / 1 voted general assembly over the month.

Investment strategy

An international selection of companies supporting lifelong quality education

The objective of the Sycomore Global Education fund is to outperform the MSCI AC World Net Return index by investing in three types of listed companies that contribute to education and/or vocational training: i/ companies providing education products and services, ii/ companies creating favourable learning conditions by providing products and services addressing student needs, iii/ companies that are leveraging education to deliver shared value with their stakeholders, creating positive economic and societal impact. The fund has no constraints in terms of the sectors or education fields it covers. Stock selection relies on the SPICE rating and societal contribution, on the theme of education, in keeping with the United Nations' Sustainable Development Goals and in particular SDG 4.

Inception	0.8	0.9	-7.6%	14.0%	13.5%	7.8%	-0.2	-1.1	-27.7%	-16.3%

Fund commentary

In December, most equity indexes posted positive returns on the back of improving economic data. The change in tone from the FED and the expectation of rate cuts in 2024 on the second week of the month, had an impact on sector allocation with small cap outperforming large cap in US and Europe for the first time in 2023. In this environment, the fund has underperformed. During the month, the fund benefited from the exposure to Blackbaud (software company specialized on proving (providing?) products to non-profit institutions), Duolingo (application to learn languages) and Wiley (content provider active in the scientific space). On the negative side, some of the year-to-date's contributors took a pause like Microsoft, Verisk (data provider to the insurance sector) and Stride (virtual schools in US).

Investment strategy

A selection of listed and unlisted European companies supporting the creation of durable, inclusive employment

Sycomore Inclusive Jobs is an inclusive equity fund that invests in companies creating durable, inclusive jobs, according to Sycomore AM's analysis. The fund invests 85 to 95% of its assets in listed European stocks and 5 to 10% in units of FCPR Sycomore Impact Emploi By INCO. The FCPR, managed by INCO Ventures, invests in unlisted companies and associations that are active in creating inclusive employment for people with difficult access to the job market. The main selection metric is the Good Jobs Rating, which employs three key factors to assess a company's contribution towards meeting job-related societal challenges: quantity, quality and geography. The companies in the portfolio must also operate activities aligned with the societal and environmental transitions.

Performance as of 29.12.2023

	Dec	2023	1 year	Inc.	Annu.	2022
Fund %	4.8	1.4	1.4	-14.7	-5.8	-19.9
Index %	3.2	18.6	18.6	12.6	4.6	-12.3

Statistics

	Corr.	Beta	Alpha	Vol.	Bench. Vol	Track. Error	Sharpe Ratio	Info Ratio	Draw Down	Bench. DD
1 year	0.9	0.8	-12.8%	12.5%	14.0%	6.8%	-0.2	-2.5	-17.5%	-10.4%
Inception	0.9	0.8	-10.2%	14.9%	18.0%	7.1%	-0.5	-1.5	-29.9%	-24.6%

Fund commentary

Easing bond yields and the soft-landing scenario have fostered an ideal environment for equity markets, despite the emergence of military and logistics-related tensions in the Red Sea. This environment remains constructive for sectors exposed to declining interest rates and to a cyclical rebound, including industry, renewable energy, and small and mid-caps - which feature rather heavily in the portfolio. Within this segment, the fund is benefiting from the rebound of Italian IT service companies, and notably Sesa which has reported strong quarterly growth (+13%) and is expecting vigorous market dynamics in 2024. Europe's leading industrial forklift manufacturers, Kion, may prove more resilient than expected in 2024 thanks to the potential recovery of warehouse automation investments for e-commerce.

ESG follow-up, news and dialogue

Dialogue and engagement

STMicroelectronics

We continued our dialogue with STM on the environmental impact of its activities (PFAS, water) and encouraged the company to communicate more transparently on the percentage of income that contributes positively to society and to environment, to highlight these initiatives. In the context of our engagement dialogue on diversity with the Club 30%, STM also provided more information on how it calculates the adjusted wage gap. The company plans to publish a non-adjusted indicator in 2025.

ESG controversies

Puma

In December 2023, a report from the University of Sheffield Hallam alleged that Puma and several other brands were still exposed to Uyghur forced labour through their supply chain. Puma has already responded to these allegations, denying any business relationship with the mentioned suppliers in Xinjiang, and any sourcing of cotton from the region. We had already contacted the company for supply chain concerns in Cambodia last month and have included this new report in our discussion items.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Bouygues

Our meeting was an opportunity to look back at the integration of Equans within the Bouygues Group, following the takeover in October 2022. Equans is now Bouygues' leading business (in terms of revenue). The turnover rate at Equans has fallen since the integration. Employees were able to take part in a specific stock issuance programme - employee ownership is important for the Bouygues group, which already totalled 51,000 employee shareholders before this latest issuance.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. This information has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Sycomore AM is not banned from trading on these securities prior to the dissemination of this information. Before investing, please read the fund's KIID available on our website: www.sycomore-am.com.

Investment strategy

A selection of global responsible technology players

Sycamore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3- "Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Performance as of 29.12.2023

	Dec	2023	1 year	3 yrs	Inc.	Annu.	2022	2021

1 year	0.9	1.0	-1.8%	18.0%	16.6%	7.7%	2.2	-0.5	-8.5%	-8.3%
Inception	0.9	1.0	-6.1%	21.6%	20.4%	8.0%	0.4	-0.9	-38.3%	-28.8%

Fund commentary

Technology returns were buoyed by softer than expected inflation data in the US which was then compounded by a change in the Fed's tone signaling about the future path of interest rates. The fund was up around 5% in December, outperforming our benchmark by approximately 2%. The relative strength was driven by our software stock picking (but helped by Microsoft's underperformance) as well as a strong performance in semiconductors (particularly from our overweight in Broadcom). We continue to be upbeat on a normalization of IT spend in 2024, but would not be surprised if the rally took a small pause tactically given that certain pockets of the tech sector are now trading on valuations not seen since the bull market of 2021. Overall, we expect 2024 to be a year of positive estimates revisions, and probably less so of multiple appreciation.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 6%

ESG follow-up, news and dialogue

Dialogue and engagement

STMicroelectronics

We continued our dialogue with STM on the environmental impact of its activities (PFAS, water) and encouraged the company to communicate more transparently on the percentage of income that contributes positively to society and to environment, to highlight these initiatives. In the context of our engagement dialogue on diversity with the Club 30%, STM also provided more information on how it calculates the adjusted wage gap. The company plans to publish a non-adjusted indicator in 2025.

ESG controversies

TSMC

Health and Safety measures are questioned by Unions and construction workers at the new plant of TSMC in Phoenix Arizona. We reached out to the company to analyze the issue and how TSMC ensures worker safety at the construction site in Arizona.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Nvidia

We met with Nvidia Head of sustainability Joshua Parker who shared a positive outline for next steps for the company and its human rights program with additional human resources dedicated to human rights, oversight at top management level and impact assessment including upstream and downstream risks.

Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

The market rebound that began on October 27th continued into December, fuelled by positive reports on US inflation and business activity. Considering that investor sentiment and valuations are now relatively high, we trimmed our equity exposure further, taking profits on companies such as Euronext and Saint Gobain. In December, the fund benefited from Vivendi's announced plans to split activities into separate entities and from the rebound on the French mid-cap market (Spie, Edenred and Amundi). In contrast, our positions in Deutsche Telekom (German government plans to reduce its shareholding) and Sodexo both underperformed.

ExecComm cov. rate: fund 100% / index 100%

ESG follow-up, news and dialogue

Dialogue and engagement

Deutsche Telekom

We recently met DT's management who gave us a very interesting insight on its ESG strategy. The group targets to reduce scope 1-3 emissions by 55% by 2030, from 2020, to be net zero emissions by 2040 and fully circular around technology and devices by 2030. We also discussed DT's strategy on cybersecurity. On the people side, we discussed the potential impact of AI on the company's workforce and started an engagement on the disclosure of the company's global gender pay gap.

ESG controversies

Renault

Renault has signed a contract in 2022 with Managem, manager of the Bou Azzer cobalt mine in Morocco. In July 2023, Reporterre highlighted the poor working and health and safety conditions at the site, which was allegedly contaminated with arsenic. These accusations were confirmed by the German newspaper SZ in November. Managem denies the accusations. Although the site has been certified by RMI, NQC and EcoVadis, Renault has announced the launch of an audit by an external third party.

Votes

1 / 1 voted general assembly over the month.

Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

The market rebound that began on October 27th continued into December, fuelled by positive reports on US inflation and business activity. Considering that investor sentiment and valuations are now relatively high, we trimmed our equity exposure further, taking profits on companies such as Euronext and Saint Gobain. In December, the fund benefited from Vivendi's announced plans to split activities into separate entities and from the rebound on the French mid-cap market (Spie, Edenred and Amundi). In contrast, our positions in Deutsche Telekom (German government plans to reduce its shareholding) and Sodexo both underperformed.

Investment strategy

Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Inception	0.9	0.2	-0.6%	5.5%	0.2	-0.4	-15.8%	1.6	4.8%	4.3%

Fund commentary

The continued retreat in bond yields, also fueled by Jerome Powell's comments following the Fed meeting, enabled risk assets to continue rising in December. Our decision to increase the fund's equity exposure, and our substantial investment in bonds, proved to be wise choices. We maintained these high levels throughout the month and increased the percentage of European small and mid-caps. The fund's main equity contributors included Vivendi, following announcements on the structure of the group, along with ASML and BNP Paribas. On the bond side, raising the fund's modified duration worked well, notably via Italian sovereign bonds and our positions in Loxam and Crédit Agricole Assurances. After the sharp drop in yields, companies will now benefit from more favourable financial conditions. Early 2024, we may take some profits on several of our bond investments.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

The market rebound that began on October 27th continued into December, fuelled by positive reports on US inflation and business activity. Considering that investor sentiment and valuations are now relatively high, we trimmed our equity exposure further, taking profits on companies such as Euronext and Saint Gobain. In December, the fund benefited from Vivendi's announced plans to split activities into separate entities and from the rebound on the French mid-cap market (Spie, Edenred and Amundi). In contrast, our positions in Deutsche Telekom (German government plans to reduce its shareholding) and Sodexo both underperformed.

Net equity exposure

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KIID available on our www.sycomore-am.com website.

*Shareclass I created on 29/06/2007, past values over this date are simulated from the shareclass A.

Gender equality ♀/ ♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate: fund 100% / index 99%

ExecComm cov. rate: fund 100% / index 100%

ESG follow-up, news and dialogue

Dialogue and engagement

Deutsche Telekom

We recently met DT's management who gave us a very interesting insight on its ESG strategy. The group targets to reduce scope 1-3 emissions by 55% by 2030, from 2020, to be net zero emissions by 2040 and fully circular around technology and devices by 2030. We also discussed DT's strategy on cybersecurity. On the people side, we discussed the potential impact of AI on the company's workforce and started an engagement on the disclosure of the company's global gender pay gap.

ESG controversies

Renault

Renault has signed a contract in 2022 with Managem, manager of the Bou Azzer cobalt mine in Morocco. In July 2023, Reporterre highlighted the poor working and health and safety conditions at the site, which was allegedly contaminated with arsenic. These accusations were confirmed by the German newspaper SZ in November. Managem denies the accusations. Although the site has been certified by RMI, NQC and EcoVadis, Renault has announced the launch of an audit by an external third party.

Investment strategy

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycamore Sélection Crédit aims to deliver financial returns above those of the Barclays Capital Euro Corporate ex-Financial Bonds (reinvested coupons) over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

Performance as of 29.12.2023

	Dec	2023	1 year	3 yrs	5 yrs	Inc. Annu.	2022	2021	2020	2019

Inception	0.5	0.5	1.9%	2.9%	3.3%	3.1%	0.9	0.4	-14.3%	-17.5%

Fund commentary

Inflation continued to ebb on either side of the Atlantic. The Fed issued dovish statements, paving the way for interest rate cuts in the very near future. The ECB's meeting was rather more cautious: no rate cuts have yet been mentioned. The PEPP asset purchase programme that was set up during the pandemic will be gradually unwound from July 2024. Yields eased considerably in the wake of this macro news, with 5 and 10-year OAT French bond yields dipping by around 70 bp. Spreads contracted across all segments. Investment Grade and High-Yield narrowed by around 10 and 30 bp, respectively. As is customary, the primary market gradually dried up. We nevertheless subscribed to the Loxam issuance: a bond maturing in 2029, rated BB- and bearing a coupon of 6.37%. The Synlab pharma company, rated B, also issued a bond maturing in 2031 and bearing a coupon of 7.87%.

Investment strategy

Sycoyield 2026 is a maturity fund seeking yield opportunities in the bond markets. It invests mainly in high-yield corporate bonds issued in euros, with a maturity date mainly in 2026 and which are intended to be held until their maturity. The selection of issuers takes into account environmental, social and governance issues.
