Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycomore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

Eurozone equity markets closed the month and the year at historic highs, buoyed by hopes that corporate earnings growth will resume in the region in 2026 (after three years of stagnation) and that the ECB will maintain its accommodative monetary policy. Once again, this environment was particularly constructive for the banking sector (Société Générale, BNP Paribas) and for several cyclicals that had lagged in 2025, such as Cap Gemini and Smurfit Westrock. Conversely, defensive stocks struggled to keep up, as did EssilorLuxottica, hit by Google's plans to enter the lucrative smart glasses market. Within the portfolio, switches were made within the aeronautics and defence sectors (we trimmed Airbus and introduced Rheinmetall after the stock fell 20% over the past two months) and within banks (Societe Generale was reduced in favour of ING).

Fund

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 22%

ESG follow-up, news and dialogue

Dialogue and engagement

LVMH

We attended a FABRIC engagement call with LVMH. The group is being implementing environmental commitments into internal audit processes by the new head of internal audit. Moreover, the group acknowledges that biodiversity represents its number one risk since all materials are sourced from nature, requiring reduced impact on biodiversity and ecosystem regeneration to maintain business sustainability in coming years. Nevertheless, it does not plan to publish a biodiversity footprint.

ESG controversies

No comment

Votes

0 / 0 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Hermès

We also attended a FABRIC engagement call with Hermès. The group maintains a strong long-term commitment to biodiversity and responsible sourcing and emphasized its craftsmanship philosophy and partnership model with its suppliers. It also acknowledges that biodiversity methodologies remain immature globally. The group has completed SBTN steps 1 and 2. Its finding is that 97% of their biodiversity impact comes from animals and then metals and plant-based materials.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. This information has not been prepared in accordance with legal requirements designed to promote the independence of investment research. Sycomore AM is not banned from trading on these securities prior to the dissemination of this information. Before investing, please read the fund's KID available on our website: www.sycomore-am.com.

Investment strategy

A selection of stocks from the eurozone with small and medium capitalisation

Sycomore Sélection Midcap seeks to outperform the MSCI EMU Smid Cap Net Return Index (dividends reinvested) over a minimum investment horizon of five years, by investing primarily in companies headquartered in European Union member states with a market capitalisation of less than €15 billion. With 60% to 100% exposure to EU equities, the fund focuses specifically on the small and mid-cap segment, with no sector constraints. Our ESG exclusion and selection methodology is fully integrated into our fundamental analysis of companies.

Performance as of 31.12.2025

								Vol.	Error	Ratio
08/20*	1.0	1.0	-3.3%	16.1%	15.1%	5.0%	0.4	-0.7	-30.2%	-27.9%

Fund commentary

The year has ended on a positive note with a series of indicators pointing in the right direction (US GDP, Eurozone PMI, deployment of the German investment plan) and we are entering 2026 with a constructive view on European small & mid-caps, which continue to offer attractive upside potential. During the period, the defence sector regained some ground. Babcock, which specialised in maintenance and engineering services for the British navy, was the fund's leading contributor to performance in December. Furthermore, Sopra finally recovered, reporting end-of-year data that seems aligned with market expectations, notably thanks to stronger activity in France and the United Kingdom despite on-going issues around the budget in France (40% of the group's business is derived from the public sector).

A selection of European stocks that meet the PEA-PME selection criteria

Sycomore Selection PME aims to achieve significant performance over a minimum recommended investment horizon of five years, investing primarily in listed companies that meet the PEA-PME selection criteria. With 60% to 100% exposure to EU equities, the fund specifically targets the European mid-cap segment (SMEs and mid-cap companies) that meet the PEA-PME selection criteria, with no sector constraints. Our ESG exclusion and selection methodology is fully integrated into our fundamental analysis of companies.

Fund commentary

Despite the severe geopolitical and trade-related uncertainties that marred 2025, the global economy proved highly resilient (3.2% growth according to OECD forecasts) and stock markets rose substantially. Smid caps benefited from rekindled investor interest, which allowed the fund to rise by almost 20% over the year. Bilfinger, Technogym, Pfisterer and Almirall also largely contributed to this robust performance. The year ended on a positive note, with a strong month for the fund. Performances were driven by Vienna Insurance Group, a position we initiated at the very start of the month, one third of the stock's annual rise (>100%) has been delivered since December 4th, when the company's new strategic plan was unveiled. VIG is a leading insurance company operating in the Austrian and East European market. The firm displays a very high solvency ratio (286% prior to the takeover of Nürnberger) and is trading at a discount we feel is unjustified relative to comparable peers in Europe.

Staff growth ^{**}

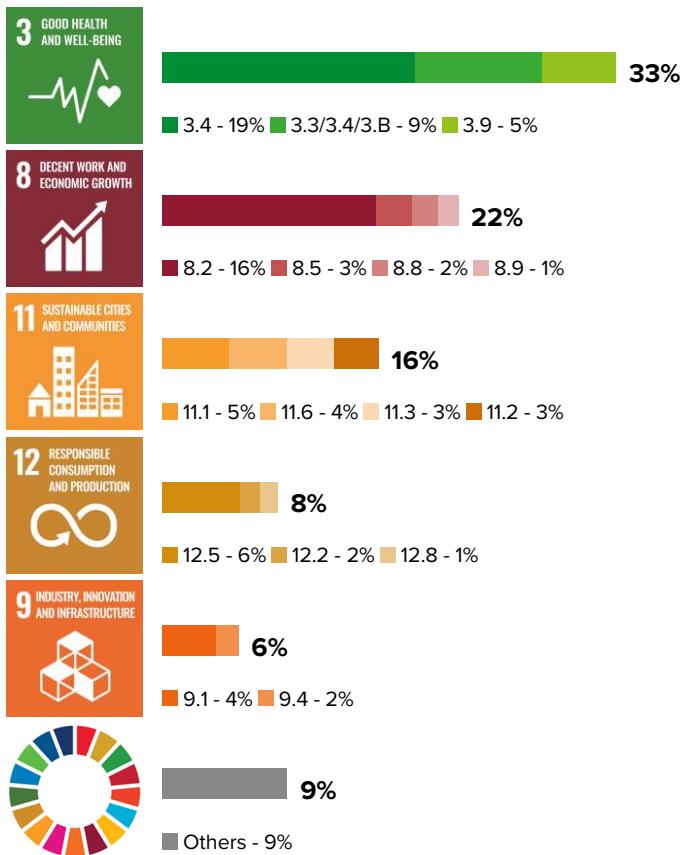

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 87% / index 90%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 25%

ESG follow-up, news and dialogue

Dialogue and engagement

Equasens

We resumed our engagement dialogue with Equasens on human capital issues, as part of the Club SMID. We had a very open discussion with the HR Director and her team. In 2025, the group launched its first global employee engagement survey with ChoosemyCompany. Our recommendations included disclosing the findings in the next URD (participation and engagement ratio, but also areas for improvement and initiatives set up).

Séché Environnement

We met with the company's Head of CSR and addressed a variety of topics: climate strategy, Science Based Targets Network certification, social issues, responsible business conduct and governance. Séché has made headway into the collection and analysis of carbon emission data and should publish more information on the contribution of each decarbonisation lever in its next annual report.

A European selection of companies supporting the environmental transition

Sycomore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Fund commentary

2025 was characterised by extreme market volatility owing to Trump policies (tariffs, rulings against the environmental transition and the migration policy, the race for technological supremacy via different AI models and geopolitical tensions within Europe and further afield (Ukraine, US-China, Middle East). In spite of this backdrop, inflation gradually abated, central banks introduced rate-cutting cycles, and the economy remained solid, allowing the portfolio to gain over 10% during the year, with Europe outperforming by a wide margin in the first half of 2025. The theme of electrification and energy efficiency drove performance, as the need for electrons and additional infrastructure fuelled by AI continues to challenge the energy sector, despite disruptions at the start and the end of the year caused respectively by DeepSeek and by concerns over the financing and monetization of AI usage. Construction, sustainable consumer spending and forestry lagged other sectors, amid a decoupled market environment. While the narrative on the environmental transition has been somewhat scorched (and its regulatory and fiscal counterpart disrupted), the physical constraints remain a fact, rendering business models resilient, both in terms of access to energy and to natural resources, and the need for adaptation is intensifying. These three angles offer plenty of opportunities for our strategy.

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 8%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

ESG follow-up, news and dialogue

Dialogue and engagement

Munich Re

We had a call with the company as lead of the 30% Club Germany. Munich Re reaffirmed its strong commitment to gender diversity despite global DEI backlash. Leadership programs have good female representation, and the company actively challenges unbalanced candidate pools. There is room for progress at the board level. On climate topics, the group remains committed to phasing out the (re)insurance of thermal coal by 2040 and now aims to divest all thermal coal investments by the end of 2030.

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 100% / index 67%

Greenfin Breakdown

Companies breakdown according to their green revenues' content and to excluded activities as defined by the Greenfin certification and as estimated by Sycomore AM or audited by Novethic [label Greenfin](#), estimated by Sycomore AM or audited by Novethic.

- Type I > 50% of Revenue (Fund 40%, Index 3%)
- Type II 10 to 50% of Revenue (Fund 31%, Index 2%)
- Type III < 10% of Revenue (Fund 19%, Index 54%)
- Excluded (Fund 4%, Index 3%)
- Non covered (Fund 6%, Index 38%)

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.

Coverage rate : fund 99% / index 96%

Carbon emission reductions^{oo}

Proportion of investments that have not taken initiatives to reduce their carbon emissions.

Coverage rate : fund 100% / index 72%

European taxonomy

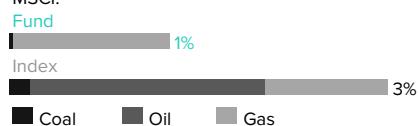

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 99% / index 98%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by MSCI.

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 70%

Staff growth

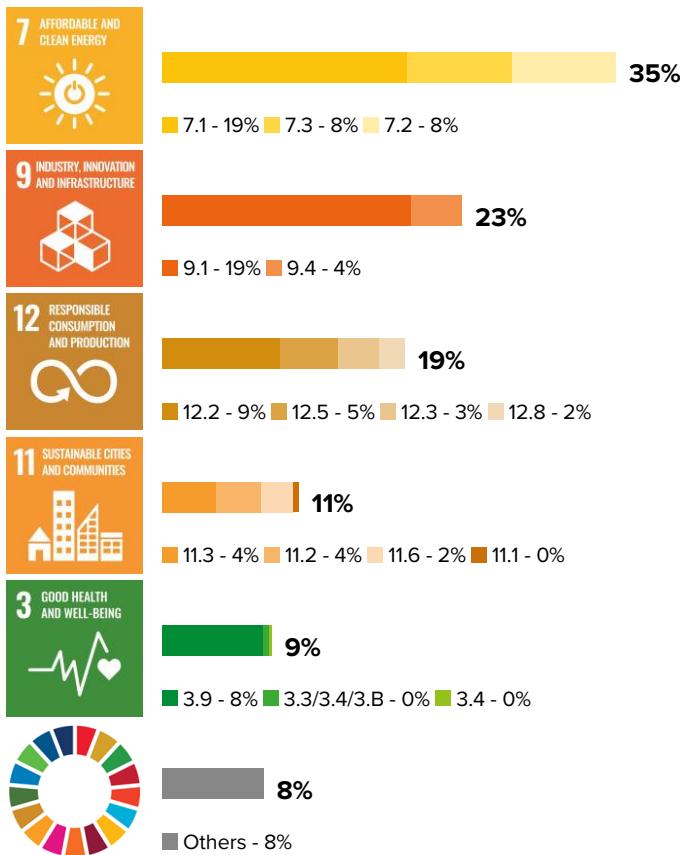

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 99% / index 96%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

A responsible selection of people-driven EU companies

Sycomore Europe Happy@Work invests in EU companies that pay particular attention to the importance of human capital as a key performance driver. The fund seeks to contribute positively to the human capital issues highlighted in the United Nations' Sustainable Development Goals. Stocks are selected on the basis of rigorous fundamental analysis combined with in-depth ESG research, focusing on a company's ability to promote employee fulfillment and engagement, using a proprietary assessment framework. The analysis draws from the experience and knowledge of field experts, human capital managers and employees. Fund managers also carry out on-site visits. The fund seeks to outperform the Euro Stoxx TR index over 5 years.

Performance as of 31.12.2025

Fund %	Dec	2025	1 year	3 yrs	5 yrs	Inc.	Annu.	2024	2023	2022	2021
Index %	2.5	24.3	24.3	60.9	73.1	121.8	7.9	9.3	18.5	-12.3	22.7

Performance prior to 11/04/2015 was achieved by an identical French fund created on 07/06/2015, which was liquidated in favour of the Luxembourg sub-fund.

Inception	0.9	0.8	1.7%	14.6%	17.6%	7.2%	0.5	0.0	-31.4%	-37.9%

Fund commentary

Euro-zone equity markets ended December on a positive trajectory, closing a strong year in terms of absolute performances. Financial companies led again in terms of performance, confirming their year-to-date leadership, with particularly Spanish players in the portfolio being particularly strong (Santander, Caixabank, BBVA), in insurance, Prudential in the Asian life insurance and savings market also performed well. In industrials, Siemens Energy and Siemens stood out, supported by a positive outlook going into 2026 on the back of strong demand for power generation, electrification and data center investments. On the negative side, EssilorLuxottica declined strongly on the back of new entrants in the wearables space, even though this is more likely a driver of faster market penetration rather than a negative impact on the company's growth opportunities. Elis declined as well, signalling a more prudent outlook for growth in 2026, despite its contract-based resilient business model.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

ESG follow-up, news and dialogue

Dialogue and engagement

Munich Re

We had a call with the company as lead of the 30% Club Germany. Munich Re reaffirmed its strong commitment to gender diversity despite global DEI backlash. Leadership programs have good female representation, and the company actively challenges unbalanced candidate pools. There is room for progress at the board level. On climate topics, the group remains committed to phasing out the (re)insurance of thermal coal by 2040 and now aims to divest all thermal coal investments by the end of 2030.

ESG controversies

Microsoft

During the last month of the year, in Ireland was launched an investigation into alleged noncompliance with EU Digital Services Act over illegal content reporting mechanisms on social media platforms. This concerns LinkedIn but also TikTok for ByteDance.

Votes

1/1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Nvidia

We participated in the biannual ESG call with the company. Nvidia is committed to fully publish its scope 3 emissions, including emissions related to the use of its products. Net zero feasibility throughout the value chain is hampered by retail and enterprise segments. The group does not plan to link CEO remuneration to the achievement of ESG targets.

SAP

A US software company has filed a lawsuit against SAP for breaching trade secrets.

ESG commentary

We kept engaging with companies on biodiversity in December via FABRIC (an FfB collaborative initiative), with two follow-up calls with Hermès (lead) and LVMH (support). We remain convinced that disclosure of key raw materials traceability/country of origin, in particular for leather, is one of the main areas of improvement for the sector.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. A responsible selection of that address today's social challenges.global companies

Sycomore Global Social Impact invests in companies that have a positive impact with regard to social issues, such as those highlighted by the United Nations' Sustainable Development Goals. We are convinced that companies that meet current social challenges are the most likely to generate sustainable operational and financial performance. Stock selection is based on a rigorous fundamental analysis that integrates sustainable development issues with a strong social dimension. This analysis is based on our SPICE model and our proprietary metrics associated with the different stakeholders that make up society (Consumers, Employees and Communities): the Social Contribution, the Happy@Work rating and the Good Jobs Rating. The investment universe is global, with no restrictions on capitalisation size.

Fund commentary

Global equity markets ended December on a flattish trajectory, with investors reassessing the outlook for monetary policy heading into the new year. The ongoing debate around a potential AI driven market bubble contributed to volatility, although sentiment gradually improved as the month progressed. Against this backdrop, we continued to increase diversification within the fund while maintaining exposure to long term structural themes such as Chinese equities, power generation, and memory technologies. In this environment, the fund outperformed its reference index. Outperformance was primarily driven by strong stock selection within the information technology, communication services and materials sectors.

ESG follow-up, news and dialogue

Dialogue and engagement

Intesa Sanpaolo

We met with the Head of SRI investor relations and deputy head of investor relations. The company offers impact products and green mortgages that come with preferential rates and that are seen as a way to attract clients. The bank does not expect the ECB to impose higher capital requirements for exposure to fossil fuel activities. Intesa is committed to find transition finance solutions to contribute to deliver real world emission reductions (e.g. conversion of coal-fired power plant)

Nvidia

We participated in the biannual ESG call with the company. Nvidia is committed to fully publish its scope 3 emissions, including emissions related to the use of its products. Net zero feasibility throughout the value chain is hampered by retail and enterprise segments. The group does not plan to link CEO remuneration to the achievement of ESG targets.

ESG follow-up, news and dialogue

Dialogue and engagement

Intesa Sanpaolo

We met with the Head of SRI investor relations and deputy head of investor relations. The company offers impact products and green mortgages that come with preferential rates and that are seen as a way to attract clients. The bank does not expect the ECB to impose higher capital requirements for exposure to fossil fuel activities. Intesa is committed to find transition finance solutions to contribute to deliver real world emission reductions (e.g. conversion of coal-fired power plant)

Nvidia

We participated in the biannual ESG call with the company. Nvidia is committed to fully publish its scope 3 emissions, including emissions related to the use of its products. Net zero feasibility throughout the value chain is hampered by retail and enterprise segments. The group does not plan to link CEO remuneration to the achievement of ESG targets.

A selection of listed and unlisted European companies supporting the creation of durable, inclusive employment
Sycomore Inclusive Jobs is an inclusive equity fund that invests in companies creating durable, inclusive jobs, according to Sycomore AM's analysis. The fund invests 85 to 95% of its assets in listed European stocks and 5 to 10% in units of FCPR Sycomore Impact Emploi By INCO. The FCPR, managed by INCO Ventures, invests in unlisted companies and associations that are active in creating inclusive employment for people with difficult access to the job market. The main selection metric is the Good Jobs Rating, which employs three key factors to assess a company's contribution towards meeting job-related societal challenges: quantity, quality and geography. The companies in the portfolio must also operate activities aligned with the societal and environmental transitions.

Inception	0.9	0.8	-7.7%	13.1%	16.0%	6.5%	-0.2	-1.6	-29.9%	-24.6%

Fund commentary

Despite the severe geopolitical and trade-related uncertainties that marred 2025, the global economy proved highly resilient (3.2% growth according to OECD forecasts) and stock markets rose substantially. Smid caps benefited from rekindled investor interest, which allowed the fund - which is over-exposed to this asset class - to recover after three challenging years and post an annual performance close to 20%. Technogym was the fund's leading contributor to performance in 2025. The world-leading manufacturer of sports and leisure equipment continued to display outstanding financial health, with two-digit sales growth in 2025 and a steadily growing margin. The launch of new products (successful Artis range and new Reform range for Pilates) and an improved penetration rate in the United States should maintain this robust momentum. Kion, Bankinter and Danieli also largely contributed to the fund's robust performance in 2025. The year and the month of December ended on a positive note thanks to the strong performances delivered by Biomérieux, El.En, CAF and Elia Group.

Investment strategy

A selection of global responsible technology players

Sycomore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3- "Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Fund commentary

December was broadly flat for global technology, while our portfolio finished positive. As in prior months, semiconductors outperformed software. Our outperformance was driven by strong stock selection across both sleeves, with a modest lift from sector allocation. MongoDB, Coherent, and Synopsys were key contributors, complemented by Western Digital and our Asian semis exposure (SK Hynix, Naura, Renesas). Weakness came from Korean small/mid-caps—Eugene and Hanmi—alongside GitLab's disappointing earnings. We also used some volatility in Korea and the memory value chain to add to Eugene, Hanmi, and Hynix. While we remain constructive on software valuations and fundamentals, we trimmed underperformers and re concentrated into names we believe to be AI winners in Software, notably Intuit and MongoDB. Finally, despite persistent media scepticism about the AI infrastructure build out, adoption is accelerating, models are improving fast, financing remains plentiful while valuations remain reasonable (many names on <20x our EPS estimates), we remain very bullish.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG controversies

Microsoft

During the last month of the year, in Ireland was launched an investigation into alleged noncompliance with EU Digital Services Act over illegal content reporting mechanisms on social media platforms. This concerns LinkedIn but also TikTok for ByteDance.

Votes

4 / 4 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

ESG commentary

In December, we proactively engaged with companies to communicate our voting intentions ahead of key shareholder meetings. In particular, we reached out to Microsoft and Palo Alto to share our perspectives and concerns on several recurring governance topics. Our discussions focused on the robustness of their auditor selection and rotation policies, the composition and effectiveness of their boards, and the extent to which ESG criteria are embedded in executive remuneration frameworks.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycomore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

In December, capital markets were dominated by monetary easing expectations in the US, high sovereign and corporate bond issuance, and elevated volatility across long-term rates. Despite equity markets hitting all-time highs, gold and its derivatives rose to new records - a sign of jittery bond markets. The portfolio benefited from its exposure to European equity markets, notably industrials, and from positive stock selection within the technology sector (Coherent in the United States and Naura Technology in Asia) and telecoms (Telecom Italia and Baidu in Asia). We took advantage of the correction in US stock markets to raise our equity weighting after some profit taking at the beginning of the month. This strategy, aimed at using volatility to strengthen our exposure, shall be maintained as long as our view remains constructive. We increased our exposure to the European banking sector with the introduction of Natwest and Santander, these investments were partially funded with the sale of our position in KBC Group. We took profits on ASML, Bilfinger and Prysmian.

Investment strategy

Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

In the US, the flow of official economic data resumed after the government shutdown and painted a mixed picture on the state of the economy: growth is still present, but at a weaker pace, and is rather uneven across sectors. The colossal amount of capex deployed for AI is one of the main factors supporting the economy. Unemployment has continued to rise slowly, feeding expectations of a rate cut by the Fed in 2026 after a cut in December. In Europe, the ECB left its rates unchanged. In our view, a rate cut is likely in 2026 considering the weakness of demand and contained inflation readings. In France, the political impasse persists and is keeping sovereign rates under pressure. In this environment, markets delivered positive returns, notably cyclical sectors such as banks and commodities. Within the portfolio, Société Générale, BPER and Santander contributed positively to performance, as did Newmont. The fund's equity exposure fluctuated between 30% and 34% during the month. We have kept the fund's duration relatively low by focusing on the carry yield delivered by corporate bonds. We initiated partial hedging on our dollar exposure.

Coverage rate : fund 98% / index 99%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 27%

ESG follow-up, news and dialogue

Dialogue and engagement

Schaeffler

Schaeffler has supplied details on the restructuring plan and clarified its intention to facilitate retirements and voluntary departures, while maintaining a smooth dialogue with employee representatives. No strikes have been announced so far.

Nvidia

We participated in the biannual ESG call with the company. Nvidia is committed to fully publish its scope 3 emissions, including emissions related to the use of its products. Net zero feasibility throughout the value chain is hampered by retail and enterprise segments. The group does not plan to link CEO remuneration to the achievement of ESG targets.

ESG controversies

Microsoft

An investigation into alleged non-compliance with EU Digital Services Act over illegal content reporting mechanisms on social media platforms was opened in Ireland in December. This concerns LinkedIn but also TikTok for ByteDance.

SAP

A US software company has filed a lawsuit against SAP for breaching trade secrets.

Votes

1 / 1 voted general assembly over the month.

Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

In the US, the flow of official economic data resumed after the government shutdown and painted a mixed picture on the state of the economy: growth is still present, but at a weaker pace, and is rather uneven across sectors. The colossal amount of capex deployed for AI is one of the main factors supporting the economy. Unemployment has continued to rise slowly, feeding expectations of a rate cut by the Fed in 2026 after a cut in December. In Europe, the ECB left its rates unchanged. In our view, a rate cut is likely in 2026 considering the weakness of demand and contained inflation readings. In France, the political impasse persists and is keeping sovereign rates under pressure. In this environment, markets delivered positive returns, notably cyclical sectors such as banks and commodities. Within the portfolio, Société Générale, BPER and Santander contributed positively to performance, as did Newmont. The fund's equity exposure fluctuated between 30% and 34% during the month. We have kept the fund's duration relatively low by focusing on the carry yield delivered by corporate bonds. We initiated partial hedging on our dollar exposure.

ESG scores

	Fund
ESG*	3.3/5
Environment	3.3/5
Social	3.3/5
Governance	3.3/5

Environmental analysis

Net Environmental Contribution (NEC)**

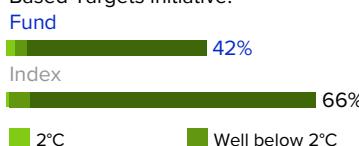

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the (nec-initiative.org) based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 98% / index 99%

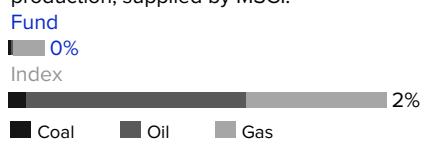

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

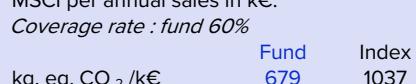

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by MSCI.

Carbon intensity of sales **

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.

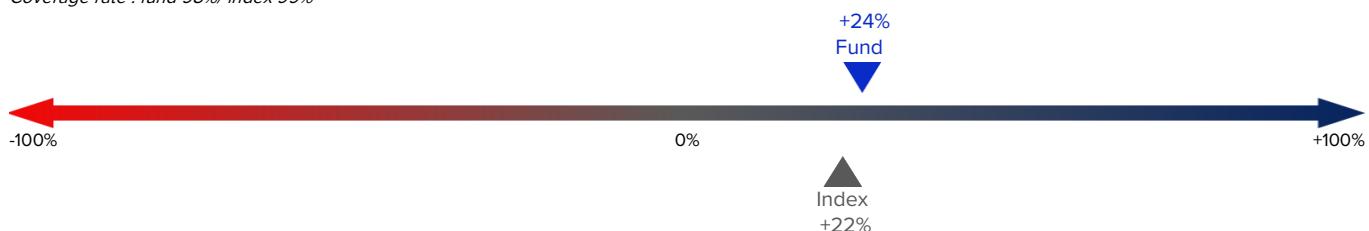

Societal and social analysis

Societal contribution

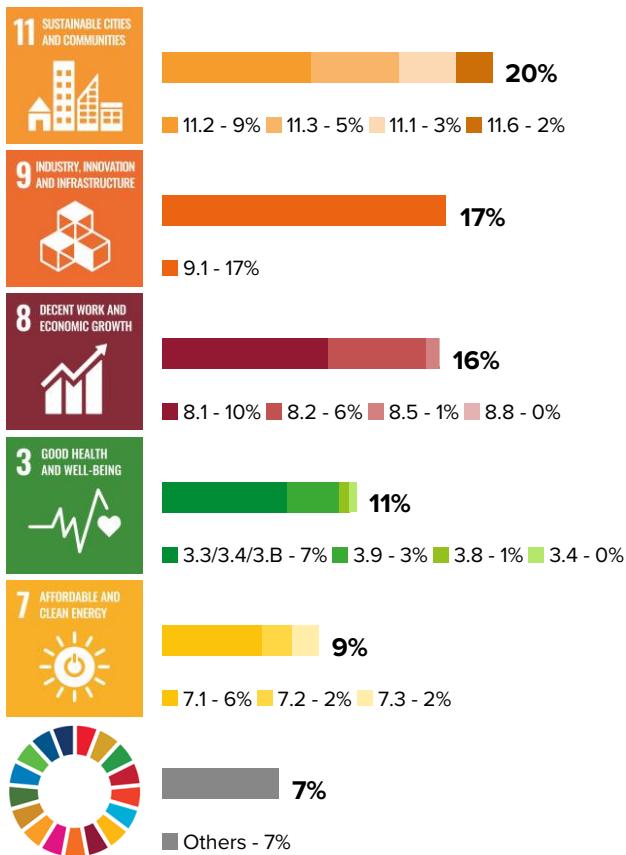

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 98% / index 99%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 27%

ESG follow-up, news and dialogue

Dialogue and engagement

Schaeffler

Schaeffler has supplied details on the restructuring plan and clarified its intention to facilitate retirements and voluntary departures, while maintaining a smooth dialogue with employee representatives. No strikes have been announced so far.

Nvidia

We participated in the biannual ESG call with the company. Nvidia is committed to fully publish its scope 3 emissions, including emissions related to the use of its products. Net zero feasibility throughout the value chain is hampered by retail and enterprise segments. The group does not plan to link CEO remuneration to the achievement of ESG targets.

ESG controversies

Microsoft

An investigation into alleged non-compliance with EU Digital Services Act over illegal content reporting mechanisms on social media platforms was opened in Ireland in December. This concerns LinkedIn but also TikTok for ByteDance.

SAP

A US software company has filed a lawsuit against SAP for breaching trade secrets.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication. Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

In December, capital markets were dominated by monetary easing expectations in the US, high sovereign and corporate bond issuance, and elevated volatility across long-term rates. Despite equity markets hitting all-time highs, gold and its derivatives rose to new records - a sign of jittery bond markets. The portfolio benefited from its exposure to European equity markets, notably industrials, and from positive stock selection within the technology sector (Coherent in the United States and Naura Technology in Asia) and telecoms (Telecom Italia and Baidu in Asia). We took advantage of the correction in US stock markets to raise our equity weighting after some profit taking at the beginning of the month. This strategy, aimed at using volatility to strengthen our exposure, shall be maintained as long as our view remains constructive. We increased our exposure to the European banking sector with the introduction of Natwest and Santander, these investments were partially funded with the sale of our position in KBC Group. We took profits on ASML, Bilfinger and Prysmian.

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycomore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

Fund commentary

Long-term € rates suffered from tensions during the month which accentuated the steepening of sovereign yield curves. Investors are concerned over the magnitude of public bond issuance in 2026 on account of the large fiscal deficits expected in both France and Germany. As planned, the ECB left its rates unchanged. The market is expecting short-term rates to remain stable over the next twelve months. In France, the Parliament finally agreed on the social security budget for 2026, allowing the French risk premium to retreat. Credit spreads eased across all segments as the primary market dried up at the end of the month. This caused HY indices to outperform Investment Grade by a wide margin - the latter are in negative territory. Asmodee, the global leader in tabletop gaming - a spin-off of Swedish media group Ambracer - issued a bond maturing in 2031 to refinance its FRN issued a year earlier. Asmodee's strong earnings trajectory contributed to the market's very positive response to the issuance, which came with a 150-bp coupon reduction. Celsa is a Spanish manufacturer of circular, low carbon steel. The company raised €1.2 billion through the bond market to lengthen the maturity of its debt. In our view, the 8.25% coupon is attractive considering the B/B2 rating and 5-year maturity.

Investment strategy

A responsible and opportunistic selection of Investment Grade bonds based on a proprietary ESG analysis

Sycomore Environmental Euro IG Corporate Bonds aims to outperform the Bloomberg Euro Aggregate Corporate Ex-Financials TR index over a recommended minimum investment period of 3 years by investing in bonds issued by companies whose business model, products, services or production processes make a positive contribution to the challenges of energy and ecological transition through a thematic SRI strategy.

Performance as of 31.12.2025

				Vol		Error	Ratio	Ratio	Down	DD
Inception	1.0	0.9	1.1%	2.8%	3.0%	0.8%	0.8	0.8	-1.9%	-2.0%

Fund commentary

Long-term € rates suffered from tensions during the month which accentuated the steepening of sovereign yield curves. Investors are concerned over the magnitude of public bond issuance in 2026 on account of the large fiscal deficits expected in both France and Germany. As planned, the ECB left its rates unchanged. The market is expecting short-term rates to remain stable over the next twelve months. In France, the Parliament finally agreed on the social security budget for 2026, allowing the French risk premium to retreat. Credit spreads eased across all segments as the primary market naturally dried up at the end of the month. This caused HY indices to outperform Investment Grade by a wide margin - the latter are in negative territory.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

	Fund	Index
SPICE	3.6/5	3.4/5
S score	3.5/5	3.1/5
P score	3.6/5	3.5/5
I score	3.5/5	3.5/5

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

Investment strategy

A responsible and opportunistic selection of €-denominated Investment Grade bonds based on a proprietary ESG analysis.

Sycomore Euro IG Short Duration invests in €-denominated Investment Grade bonds with maturities of 0 to 5 years (with a minimum of 50% of net assets invested in maturities of 0 to 3 years), over a minimum investment horizon of two (2) years. No more than 10% of the net assets may be invested in high-yield securities. Similarly, investments in unrated securities will not represent more than 10% of the net assets.

The investment strategy consists of a rigorous selection of bonds and other debt securities denominated in euros, issued by private or public-sector issuers and similar entities, to which the Fund will be exposed at all times between 60% and 100% of the net assets, including a maximum of 20% of the net assets for public-sector issuers and similar entities, with no sector or geographical allocation restrictions (with the exception of exposure to non-OECD countries, including emerging countries, limited to a maximum of 10% of the net assets).

Fund commentary

Long-term € rates suffered from tensions during the month which accentuated the steepening of sovereign yield curves. Investors are concerned over the magnitude of public bond issuance in 2026 on account of the large fiscal deficits expected in both France and Germany. As planned, the ECB left its rates unchanged. The market is expecting short-term rates to remain stable over the next twelve months. In France, the Parliament finally agreed on the social security budget for 2026, allowing the French risk premium to retreat. Credit spreads eased across all segments as the primary market dried up at the end of the month. This caused HY indices to outperform Investment Grade by a wide margin - the latter are in negative territory. Asmodee, the global leader in tabletop gaming - a spin-off of Swedish media group Ambracer - issued a bond maturing in 2031 to refinance its FRN issued a year earlier. Asmodee's strong earnings trajectory contributed to the market's very positive response to the issuance, which came with a 150-bp coupon reduction. Celsa is a Spanish manufacturer of circular, low carbon steel. The company raised €1.2 billion through the bond market to lengthen the maturity of its debt. In our view, the 8.25% coupon is attractive considering the B/B2 rating and 5-year maturity.

Investment strategy

Sycyield 2032 is a fixed-term fund seeking yield opportunities in the bond markets. It invests primarily in a rigorous selection of bonds (including convertible and subordinated bonds known as hybrids¹) issued in euros, with maturities mainly in 2032, which are intended to be held until maturity. The carry strategy aims to achieve an annualised performance net of fees, in line with the markets for bonds issued mainly by private issuers, of any rating, with an average maturity of 2032 over an investment horizon of 7 years and 6 months. This objective is based on Sycomore AM's market assumptions² and does not constitute a promise of return or performance for the fund, which presents a risk of capital loss.

Performance as of 31.12.2025

According to the current legislation, we cannot disclose the performance of a fund that has a reference period of less than 12 months. For further information, please contact our team.

Fund commentary

Long-term € rates suffered from tensions during the month which accentuated the steepening of sovereign yield curves. Investors are concerned over the magnitude of public bond issuance in 2026 on account of the large fiscal deficits expected in both France and Germany. As planned, the ECB left its rates unchanged. The market is expecting short-term rates to remain stable over the next twelve months. In France, the Parliament finally agreed on the social security budget for 2026, allowing the French risk premium to retreat. Credit spreads eased across all segments as the primary market dried up at the end of the month. This caused HY indices to outperform Investment Grade by a wide margin - the latter are in negative territory. Asmodee, the global leader in tabletop gaming - a spin-off of Swedish media group Ambracer - issued a bond maturing in 2031 to refinance its FRN issued a year earlier. Asmodee's strong earnings trajectory contributed to the market's very positive response to the issuance, which came with a 150-bp coupon reduction. Celsa is a Spanish manufacturer of circular, low carbon steel. The company raised €1.2 billion through the bond market to lengthen the maturity of its debt. In our view, the 8.25% coupon is attractive considering the B/B2 rating and 5-year maturity.

¹Up to a limit of 30% of net assets for hybrids and other debt or money market instruments issued by private or public issuers and similar entities, to which the net assets will be permanently exposed between 60% and 100%, of which a maximum of 30% may be for public and similar issuers, and with a maturity of no more than one year after 31 December 2032. ²These assumptions include the risk of default or downgrade of one or more issuers in the portfolio. If these assumptions materialise to a greater extent than expected, the management objective may not be achieved and the investor may suffer a capital loss. Opinions, estimates or forecasts regarding bond market trends or changes in the risk profile of issuers are based on current market conditions and are subject to change without notice. Sycomore AM makes no commitment as to their achievement.
