Investment strategy

A responsible selection of French equities based on proprietary ESG analysis

Sycamore Francecap aims to outperform its benchmark index, the CAC All-Tradable NR, over a period of five years, through a multi-thematic and socially responsible investment process drawing from our proprietary "SPICE" methodology and economic and societal contribution indicators. The fund invests without sector or market capitalisation constraints in French equities we believe to be trading at a substantial discount. Depending on the manager's forecasts, a significant portion may be allocated to mid-caps.

Performance as of 31.07.2023

Fund commentary

The H1 earnings season got off to a rather strong start with many companies confirming – and sometimes upgrading – their annual targets. These companies included Saint-Gobain, despite a challenging environment for the new-build sector in Europe, but also Burelle, Verallia, Sopra, Michelin, Worldline and Elis, which featured among top contributors to performance in July. Téléperformance, which had consistently upgraded its targets every year, has now made a second downgrade in 2023. The stock fell sharply and ranked among leading detractors in July. Boiron surged by almost 30% during the month after the family chose to delist the company. We believe the price offered is too low (EV/EBIT multiple around 10x) and may not tender our shares.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

Gender equality ♀/ ♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate: fund 100% / index 99%

ExecComm cov. rate: fund 100% / index 100%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 28%

ESG follow-up, news and dialogue

Dialogue and engagement

Soitec

We held discussions with Soitec ahead of the company's AGM. Consistent with our engagement initiative, Soitec increased the weight of ESG criteria when determining the annual bonus, 10% of which is based on internal ESG criteria and 15% on an external rating by MSCI. The company has also created an ESG Committee responsible for setting more ambitious objectives. Following the governance crisis, the company appointed a lead director whose mission will be to manage any potential conflicts of interest, though relations are now much improved.

ESG controversies

Arkema

While it seems inevitable that regulation around 'forever chemicals' (PFAS) will become stricter at European level, our initial discussions with Arkema highlighted a lack of clarity on this major issue for the chemicals industry. We were not able to determine the company's direct exposure to potentially banned pollutants, though one site does appear to be at risk, and the company has not made any provisions in relation to current or past releases. The position was trimmed.

Axa

Amundi and Axa are alleged to be indirectly funding the military repression in Myanmar according to the investigation led by NGOs Justice for Myanmar, Info Birmanie and Le Monde, published on July 6th. Based on analysis carried out by the Dutch research group Profundo, some of the investments are directed towards Indian and Chinese companies that have sold arms and military equipment to the Myanmar junta in recent months. This controversy emphasizes the duty of care applicable to French companies.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

ESG commentary

Atos held its AGM on June 28th. We spoke at the end of the session to present the resolutions we had submitted. These resolutions concerned removing the Chair of the Board and two other non-independent directors from office and appointing a new independent director, Léo Apotheker. The two resolutions were supported by 32.6% and 34.7% of shareholders, demonstrating the pertinence of our engagement initiative designed to restore trust in the company's governance.

Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

In July Eurozone equity markets posted modest positive returns, influenced by the publication of macroeconomic indicators and the ECB's meetings. At portfolio level, strong H1 earnings publications drove returns for this month's top contributors. These included Autoliv, Saint-Gobain and Michelin, which rose after reporting better-than-expected earnings and positive guidance for the remainder of the year. Furthermore, Smurfit Kappa stocks – which are trading at compelling valuations – more than offset the decline recorded in June, which had been driven by fears of inventory reductions. As far as detractors are concerned, Compass fell after reporting a rather more modest than expected improvement in its margins, while Prysmian was negatively impacted by the read across from Nexans earnings. Among the many fund movements in July, we trimmed our exposure to Nexans ahead of the company's weak earnings publication and strengthened our position in SAP.

This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

Iberdrola

We engaged with Iberdrola to discuss the company's involvement in the Belo Monte Dam project in Brazil, via its subsidiary NeoEnergia SA. Talks also focused on the quality of its interactions with the local population and indigenous communities.

Symrise

We held further talks with Symrise after earlier discussions which included requests to strengthen the company's internal control and reporting systems, notably due to the incidents that occurred in recent years (fire on a production facility in the US, human resource management, health & safety, on-going investigation for antitrust practices, erroneous financial disclosures on organic growth components...).

ESG controversies

Axa

Amundi and Axa are alleged to be indirectly funding the military repression in Myanmar according to the investigation led by NGOs Justice for Myanmar, Info Birmanie and Le Monde, published on July 6th. Based on analysis carried out by the Dutch research group Profundo, some of the investments are directed towards Indian and Chinese companies that have sold arms and military equipment to the Myanmar junta in recent months. This controversy emphasizes the duty of care applicable to French companies.

ESG commentary

On July 22nd, 2023, the French Parliament – which met to review the law on Green Industry - adopted an amendment that had been drafted earlier with members of the AMF's Climate and Sustainable Finance Commission and the Forum for Sustainable Investment, to support the development of Say on Climate votes. The amendment aims for shareholders to cast advisory votes at company AGMs on climate strategies and sustainability every 3 years, and on implementation reports every year.

A responsible selection of mid-caps

Sycamore Sélection Midcap seeks to outperform the MSCI EMU Smid Cap Net Return index (dividends reinvested) by employing a socially responsible and multi-themed investment process (energy transition, healthcare, nutrition, well-being, digital...) in keeping with the United Nations' Sustainable Development Goals (SDGs). Primarily exposed to EU country equities, the fund specifically targets the mid-cap segment, with no sector constraints. Our ESG exclusion and selection methodology is fully integrated into our corporate fundamental analysis framework.

Fund commentary

Markets enjoyed a strong rise in July, lifted by easing inflation, the ECB's softer policy on future interest rate hikes, and the first set of earnings publications - which are proving more resilient than expected. The fund underperformed during the period, impacted by its low exposure to financial and real estate stocks - which are driving index returns, and from disappointing performances posted by several portfolio positions. Ariston was impacted by a new subsidies policy in Italy which is weighing on demand, fears of over-capacity on heat pumps, and customers increasingly reluctant to invest in renewing their equipment. We chose to trim our position ahead of the company's earnings publication. Sesa continued to decline despite reporting earnings in line with expectations, including a 25% increase in its Ebitda margin. The downside was the company's cashflow generation, which was impacted by major M&A activity during the year.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 21%

ESG follow-up, news and dialogue

Dialogue and engagement

Soitec

We held discussions with Soitec ahead of the company's AGM. Consistent with our engagement initiative, Soitec increased the weight of ESG criteria when determining the annual bonus, 10% of which is based on internal ESG criteria and 15% on an external rating by MSCI. The company has also created an ESG Committee responsible for setting more ambitious objectives. Following the governance crisis, the company appointed a lead director whose mission will be to manage any potential conflicts of interest, though relations are now much improved.

Arkema

While it seems inevitable that regulation around 'forever chemicals' (PFAS) will become stricter at European level, our initial discussions with Arkema highlighted a lack of clarity on this major issue for the chemicals industry. We were not able to determine the company's direct exposure to potentially banned pollutants, though one site does appear to be at risk, and the company has not made any provisions in relation to current or past releases.

Fund commentary

Markets enjoyed a strong rise in July, supported by easing inflation, the ECB's softer stance on future interest rate hikes, and the first set of earnings publications - which are proving more resilient than expected. The fund failed to keep up with its benchmark due to the absence of real estate stocks in the portfolio - which drove returns in July, and to our unfavorable technology overweight. Furthermore, the fund's positioning focuses on smaller capitalizations (below €1 billion), which once again, lagged their mid-sized counterparts. Disappointments included Stratec, which stumbled after issuing a profit warning as customers scaled down their planned orders for H2, while Sanlorenzo was impacted by weaker dynamics in its yacht reservations.

A European selection of companies supporting the environmental transition

Sycamore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Inception	0.9	0.9	1.3%	16.9%	16.9%	7.7%	0.4	0.1	-34.2%	-35.3%

Fund commentary

The slowdown in inflation observed in the US and in Europe strengthened the likelihood of a soft landing for the economy and prompted investors to reposition their portfolios in equity markets. The first earnings publications either met or beat expectations, but these were followed by modest positive reactions on the stock market. Construction industry players such as Saint-Gobain reported record-high margins, thanks to their ability to increase the price/cost spread and the rising frequency of extreme weather events, which is boosting roofing renovation in the US. Kingspan also benefited from robust end-markets and announced it has bought a 50% stake in Steico, also held within the portfolio. ST Micro – a recent addition to the portfolio – delivered positive returns, driven once more by the resilience of its auto business. Investors took profits on several industrial stocks considered to be trading at rich valuations, repositioning their portfolios on 'value' plays which have built up a substantial lag versus the market.

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données de 2018 à 2021.

Greenfin Breakdown**

Companies breakdown according to their revenue generated by eco and excluded activities defined by [the Greenfin label](https://www.greenfinlabel.com)

Temperature rising - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.
Coverage rate : fund 74%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.
Coverage rate : fund 93% / index 98%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy

Coverage rate : fund 98% / index 99%

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Biodiversity footprint

Artificialised surface area in m² MSA per k€ invested***, measured by the Corporate Biodiversity Footprint. Mean Species Abundance (MSA) is assessed in comparison with the original state of the environment.

Coverage rate : fund 96% / index 98%

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 98% / index 76%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 98% / index 98%

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

13 CLIMATE ACTION

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

ESG follow-up, news and dialogue

Dialogue and engagement

SIG Group

We visited the SIG Group's various manufacturing and research facilities in China to better understand the production processes, the synergies developed with Scholle IPN, and how the group can achieve its extra-financial commitments across its global operations. The visit strengthened our belief in the group's ability to create value over the long-term while incorporating high environmental standards.

ERG

We had asked ERG to examine and publish its European taxonomy-aligned income and capex. The company estimated its aligned income and aligned capex at 62% and 96%, respectively, at end 2022. Following the confirmed sale of its remaining CCGT (gas) capacities, ERG's aligned income and capex will mechanically reach 100%.

Investment strategy

A global selection of companies supporting the environmental transition

Sycamore Global Eco Solutions invests in international listed companies across the entire market capitalization spectrum. The fund focuses on companies with business models that contribute to the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Fund commentary

The slowdown in inflation observed in the US and in Europe strengthened the likelihood of a soft landing for the economy and prompted investors to reposition their portfolios in equity markets. The first earnings publications either met or beat expectations, but these were followed by modest positive reactions on the stock market. Construction industry players such as Saint-Gobain and Owens Corning reported record-high margins, thanks to their ability to increase the price/cost spread and the rising frequency of extreme weather events, which is boosting roofing renovation in the US. Neste made up for its lag at the beginning of the month, but later corrected as investors reacted negatively to the company's earnings publication - which included a recurring margin below expectations and cautious guidance on volumes. ST Micro - a recent addition to the portfolio - delivered positive returns, driven once again by the resilience of its auto business. Investors took profits on several industrial stocks considered to be trading at rich valuations, repositioning their portfolios on 'value' plays which have built up a substantial lag versus the market.

Investment strategy

A responsible selection of people-driven European companies

Sycamore Europe Happy@Work invests in European companies that pay particular attention to the importance of human capital as a key performance driver. The fund seeks to contribute positively to the human capital issues highlighted in the United Nations' Sustainable Development Goals. Stocks are selected on the basis of rigorous fundamental analysis combined with in-depth ESG research, focusing on a company's ability to promote employee fulfillment and engagement, using a proprietary assessment framework. The analysis draws from the experience and knowledge of field experts, human capital managers and employees. Fund managers also carry out on-site visits. The fund seeks to outperform the Euro Stoxx TR index over 5 years.

Fund commentary

July was marked by a busy earnings season and a rotation from winners to laggards. Investors took profits on winners, such as Prysmian and Brunello Cucinelli, despite their beat-and-raise quarter. In healthcare, encouraging results from Novartis was offset by profit-taking of Novo Nordisk and the temporarily setback of Dato Phase 3 at AstraZeneca. In consumer, Puma rose significantly after posting a strong quarter, while luxury stocks suffered due to the weak Chinese macroeconomic situation. We proactively trimmed Hermès, Christian Dior and L'Oréal that have approached our target prices, and we initiated new positions in KBC (financial) and Danone (consumer staples) to further diversify the portfolio. We believe the recent market moves are short-term and not fundamentally driven, especially as many companies haven't yet reported results. We remained disciplined to take advantage of the volatilities to buy/add Happy@Work stocks that are set to outperform in the long run.

ESG follow-up, news and dialogue

Dialogue and engagement

SESA

We recently met management and we talked about the actions undertaken to improve the working conditions of their employees (4,750 at the end of last FY). Over the 2012-2023 period, the number of employees CAGR is 15%. It should be similar in 2023. Sesa recently launched new programs, of which a new welfare plan for the 4,750 employees, for the year 2023-2024, with a renewed focus on parenting, education, sustainability and well-being and initiatives dedicated to under 30 (over 1,100 employees).

ESG controversies

L'Oréal

We received new information on the hair relaxer controversy identified in October 2022. According to the document filed by the defendants on July 6th, the litigation now includes 241 cases, whereas it began with 23 lawsuits filed in January, and was at around 60 cases when it has been grouped in an Multidistrict litigation action in February. We are closely monitoring the evolution of this case, currently evaluated by Sycomore at -2, based on a scale of 0 (low risk) to -3 (high risk).

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Hermès

We engaged with Hermès on gender diversity via the 30%Club. Hermès believes it is already well positioned and transparent on core indicators, but recognizes they could improve in formalizing and disclosing of what is being implemented within the group. For example, the company is working on gathering more specific data on gender pay gap to potentially set quantitative objectives in the future.

Fund commentary

July was marked by a busy earnings season and a rotation from winners to laggards. For example, investors took profits on MedTech winners like Intuitive Surgical and rotated into Thermo Fisher which is a laggard. In tech, TSMC retreated as the consumer demand recovery is delayed to 2024, which is a timing issue that doesn't impact the company's long-term fundamentals. In consumer, Puma rose significantly after posting a strong quarter, while luxury stocks suffered due to the weak China macroeconomic situation. We proactively trimmed Hermes, LVMH and L'Oreal that have approached our target prices, and we initiated new positions in Progressive and KBC (financial) to further diversify the portfolio. We believe the recent market moves are short-term and not fundamentally driven, especially as many companies haven't yet reported results. We remained disciplined and agile to take advantage of the volatility to buy/add Happy@Work stocks that are set to outperform in the long run.

ESG follow-up, news and dialogue

Dialogue and engagement

Worley

We discussed human capital with the Investor Relations team and the Head of Sustainability at Worley. The company is looking to increase female in leadership roles and is actively re-skilling people to bring them in the transition. They seemed willing to work on improving transparency on social KPIs, such as: the % of employees by types of jobs, the ratio of employees vs contractors/contingent workers, or the average number of working hours per employee.

Hermès

We engaged with Hermès on gender diversity via the 30%Club. Hermès believes it is already well positioned and transparent on core indicators, but recognizes they could improve in formalizing and disclosing of what is being implemented within the group. For example, the company is working on gathering more specific data on gender pay gap to potentially set quantitative objectives in the future.

Investment strategy

A selection of growth securities with a positive societal impact

Sycamore Social Impact is a Eurozone equity fund that focuses on companies of any size that offer solutions to global societal challenges, and that have embedded this pursuit of positive impacts into their strategy to deliver profitable and sustainable growth. The fund aims to outperform the benchmark, the Euro Stoxx Total Return index, through a socially responsible investment process. Stock selection is based on our proprietary SPICE methodology, notably on the societal contribution of products & services indicator.

Fund commentary

Equity markets proved indecisive in July. The month ended on a positive note with a modest easing in risk aversion. This enabled small and mid-caps - such as Shop Apotheke, Esker, Gerresheimer, Salmar, Compugroup and Nexus - to perform better in relative terms. Sartorius Stedim rebounded sharply in July having reported encouraging data on inventory reductions in its Q2 earnings publication. Merck KGaA, whose Life Sciences business is the largest contributor to the company's valuation, also benefited from the prospect of improved momentum, combined with much more favourable base effects in the second half of the year. In contrast, despite reporting rather robust earnings, large pharma companies such as Astra Zeneca, Roche, Sanofi, and Novartis underperformed sharply. In another 'laggard' defensive sector, Orange and KPN also weighed on the fund's relative performance.

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KIID available on our www.sycamore-am.com website.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 5%

ESG follow-up, news and dialogue

Dialogue and engagement

SAP

We held particularly constructive discussions during our meeting with management on the issue of gender pay gap indicators: SAP has an internal pay gap indicator, but the results are not published. Employees have access to the salary range applicable to their role. We discussed the issue of disclosing the gender pay gap index and the company was very attentive to our request.

ESG commentary

Sanofi and Astra Zeneca announced that the FDA has authorised their Beyfortus vaccine, which protects newborns and infants from infections caused by RSV (known as bronchiolitis), which is the first cause of paediatric hospitalisations for infants under 12 months in the US. Beyfortus will be available on the American market before the start of the next viral season (2023-2024). The vaccine had already been approved in October 2022 in Europe, in November 2022 in Great-Britain, and in April 2023 in Canada.

Investment strategy

An international selection of companies supporting lifelong quality education

The objective of the Sycomore Global Education fund is to outperform the MSCI AC World Net Return index by investing in three types of listed companies that contribute to education and/or vocational training: i/ companies providing education products and services, ii/ companies creating favourable learning conditions by providing products and services addressing student needs, iii/ companies that are leveraging education to deliver shared value with their stakeholders, creating positive economic and societal impact. The fund has no constraints in terms of the sectors or education fields it covers. Stock selection relies on the SPICE rating and societal contribution, on the theme of education, in keeping with the United Nations' Sustainable Development Goals and in particular SDG 4.

Performance as of 31.07.2023

Inception	0.8	0.9	-11.9%	14.7%	14.0%	8.0%	-0.4	-1.6	-27.7%	-16.3%

Fund commentary

In the month of July, the fund has slightly overperformed the MSCI ACWI World. After 2 difficult months for the education thematic we have seen a rebound in July, driven by positive expectation for the reporting season that will start with the beginning of August. The positive contribution to performance has been driven by our exposure to EdTech; where Blackbaud, Instructure, Duolingo all outperform. During the month Goldman Sachs Asset Management with other co-investors has made an all cash offer for Kahoot, a Norwegian company that runs a platform for digital education. Kahoot has been one of the core holding of the Sycomore Global Education from the launch of the strategy. At the closure of the deal the stock will be up over 70% ytd. The deal confirms that valuation in the education thematic are appealing for private investors: this should have a positive impact on the all EdTech sector.

Dialogue and engagement

Udemy

During our discussion with management in June, we raised the issue of the 3 directors who had left the Board since August 2022. We were told at the time that these departures were in connection with the shareholder structure and that the recruitment of 2 directors was under way. On July 13th, Udemy announced the appointment of Sohaib Abbasi as an Independent Director. S. Abbasi has 30 years' experience within the software industry either in management roles or as a board member.

A selection of listed and unlisted European companies supporting the creation of durable, inclusive employment

Sycomore Inclusive Jobs is an inclusive equity fund that invests in companies creating durable, inclusive jobs, according to Sycomore AM's analysis. The fund invests 85 to 95% of its assets in listed European stocks and 5 to 10% in units of FCPR Sycomore Impact Emploi By INCO. The FCPR, managed by INCO Ventures, invests in unlisted companies and associations that are active in creating inclusive employment for people with difficult access to the job market. The main selection metric is the Good Jobs Rating, which employs three key factors to assess a company's contribution towards meeting job-related societal challenges: quantity, quality and geography. The companies in the portfolio must also operate activities aligned with the societal and environmental transitions.

Performance as of 31.07.2023

Inception	0.9	0.8	-11.2%	15.4%	19.0%	7.0%	-0.5	-1.6	-28.9%	-24.6%

Fund commentary

Market volatility was particularly high in July, but the month ended on a positive note. Among portfolio companies, Stedim Sartorius rebounded sharply as investors anticipated the end of customer inventory reductions during the second half of 2023. Merck KGaA, which will only publish its earnings early August, also enjoyed a strong run as the market anticipated an improved momentum in H2. Michelin – one of the fund's main convictions – rose as investors expected robust H1 earnings and the upward revision of its full year targets. Conversely, Nexity was impacted by a challenging environment for the housing industry, combined with soaring construction costs, while Carbios' stock price fell heavily on the back of the company's capital increase.

ESG follow-up, news and dialogue

Dialogue and engagement

SESA

We recently met management and we talked about the actions undertaken to improve the working conditions of their employees (4,750 at the end of last FY). Over the 2012-2023 period, the number of employees CAGR is 15%. It should be similar in 2023. Sesa recently launched new programs, of which a new welfare plan for the 4,750 employees, for the year 2023-2024, with a renewed focus on parenting, education, sustainability and well-being and initiatives dedicated to under 30 (over 1,100 employees).

Investment strategy

A selection of global responsible technology players

Sycamore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3- "Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Fund commentary

Tech had a positive July despite the underperformance of Apple and Microsoft. Tech returns are broadening out with Nasdaq Equal Weight outperforming the Nasdaq by >1% in July. We are constructive on a broader catch for the sector. Our top performers were Intuit, Nvidia and Salesforce. Palo Alto contributed negatively the most, but we had taken profits as the stock hit new highs. We will be buyers if this continues into earnings. On fundamentals, Microsoft results highlighted the strength in AI demand for cloud infra - we expect more than \$1.3bn of annualized revenue in AI for Azure in FQ1. We continue to believe that the 'picks and shovels' of AI (semis, infra software, and hardware) are best positioned to benefit in the near-term. In the longer-term, we're excited about the potential upside from Microsoft's Co-pilot, Salesforce's GPT clouds and ServiceNow's NowAssist products.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 8%

ESG follow-up, news and dialogue

Dialogue and engagement

Soitec

We held discussions with Soitec ahead of the company's AGM. Consistent with our engagement initiative, Soitec increased the weight of ESG criteria when determining the annual bonus, 10% of which is based on internal ESG criteria and 15% on an external rating by MSCI. The company has also created an ESG Committee responsible for setting more ambitious objectives. Following the governance crisis, the company appointed a lead director whose mission will be to manage any potential conflicts of interest, though relations are now much improved.

ESG controversies

Microsoft

The EU announced it has opened an antitrust investigation into Microsoft's Teams business following the complaint filed by Slack (a rival messaging service) for unfair competition. The latter claims that the Teams app is automatically bundled with its Office 365 suite, with no deletion options, while concealing the true cost associated with using the service.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

SAP

We held particularly constructive discussions during our meeting with management on the issue of gender pay gap indicators: SAP has an internal pay gap indicator, but the results are not published. Employees have access to the salary range applicable to their role. We discussed the issue of disclosing the gender pay gap index and the company was very attentive to our request.

Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycomore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Performance as of 31.07.2023

Inception	0.9	1.0	1.2%	12.6%	11.2%	6.5%	0.3	0.1	-31.7%	-29.7%

Fund commentary

The market rebounded sharply in July on the back of strong H1 earnings publications and a Goldilocks scenario. The cyclical and banking sectors outperformed while defensives lagged the market. The fund performed well in July with performances driven by GTT and Worldline. In contrast, Teleperformance continued to weigh on performances, though the position was trimmed. The fund's exposure to other service industry players, including Publicis and WPP, was also reduced.

ESG follow-up, news and dialogue

Dialogue and engagement

Deutsche Telekom

We contacted Deutsche Telekom to check the lead exposure risk from the copper cables used in its landline telephone network. The company explained that the use of copper cabling was historical and that these cables had not been installed for the past 50 years. Less than 10% of the copper landline infrastructure, which is ISO-certified and complies with European regulation, could still contain some lead. None is to be found above-ground or in the water systems.

Worldline

Meeting held with Worldline on the company's ESG strategy. On the environmental front, the company has conducted a lifecycle analysis on payment solutions; the results will help Worldline identify the priorities for decarbonizing the value chain of its products. On the social front, our discussion was an opportunity to review the One Culture Program launched in 2021. Together with the company, we shall monitor any changes in governance relating to the Chair succession plan.

Market cap breakdown

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données des années 2018 à 2021.

Coverage rate : fund 100% / index 98%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy

Coverage rate : fund 100% / index 99%

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.

Coverage rate : fund 100% / index 98%

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 97% / index 94%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 100% / index 99%

Gender equality ♀/ ♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate: fund 100% / index 99%

ExecComm cov. rate: fund 100% / index 100%

ESG follow-up, news and dialogue

Dialogue and engagement

Deutsche Telekom

We contacted Deutsche Telekom to check the lead exposure risk from the copper cables used in its landline telephone network. The company explained that the use of copper cabling was historical and that these cables had not been installed for the past 50 years. Less than 10% of the copper landline infrastructure, which is ISO-certified and complies with European regulation, could still contain some lead. None is to be found above-ground or in the water systems.

Worldline

Meeting held with Worldline on the company's ESG strategy. On the environmental front, the company has conducted a lifecycle analysis on payment solutions; the results will help Worldline identify the priorities for decarbonizing the value chain of its products. On the social front, our discussion was an opportunity to review the One Culture Program launched in 2021. Together with the company, we shall monitor any changes in governance relating to the Chair succession plan.

Investment strategy

Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

Central banks completed their final 'automatic' interest rate hikes before adopting a policy that will now be data dependent based on economic activity and inflation data. Long-term rates remained range-bound in recent months, while equity markets enjoyed a strong run. The cyclical stocks within the portfolio were lifted by strong earnings publications from companies like Stellantis, Saint-Gobain, ST Micro, Santander – and Alphabet, one of our strongest convictions within the tech industry. The fund's exposure to equities was gradually increased to reach 25%. The bond portfolio continued to rally and contributed substantially to the fund's performance. We strengthened our investments in 10-year Italian sovereign bonds in order to benefit from attractive yields.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 30%

ESG follow-up, news and dialogue

Dialogue and engagement

Sanofi

Sanofi and Astra Zeneca announced that the FDA has authorised their Beyfortus vaccine, which protects newborns and infants from infections caused by RSV (known as bronchiolitis), which is the first cause of paediatric hospitalisations for infants under 12 months in the US. Beyfortus will be available on the American market before the start of the next viral season (2023-2024). The vaccine had already been approved in October 2022 in Europe, in November 2022 in Great-Britain, and in April 2023 in Canada.

ESG controversies

Axa

Amundi and Axa are alleged to be indirectly funding the military repression in Myanmar according to the investigation led by NGOs Justice for Myanmar, Info Birmanie and Le Monde, published on July 6th. Based on analysis carried out by the Dutch research group Profundo, some of the investments are directed towards Indian and Chinese companies that have sold arms and military equipment to the Myanmar junta in recent months. This controversy emphasizes the duty of care applicable to French companies.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

SAP

We held particularly constructive discussions during our meeting with management on the issue of gender pay gap indicators: SAP has an internal pay gap indicator, but the results are not published. Employees have access to the salary range applicable to their role. We discussed the issue of disclosing the gender pay gap index and the company was very attentive to our request.

Microsoft

The EU announced it has opened an antitrust investigation into Microsoft's Teams business following the complaint filed by Slack (a rival messaging service) for unfair competition. The latter claims that the Teams app is automatically bundled with its Office 365 suite, with no deletion options, while concealing the true cost associated with using the service.

Investment strategy

Sycomore Opportunities is a feeder fund of Sycomore Partners (Master Fund) and invests at least 95% of its net assets in "MF" units of its Master Fund and up to 5% in cash.

Sycomore Partners, a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Inception	0.8	0.8	0.4%	9.9%	10.2%	6.4%	0.3	-0.1	-27.0%	-33.4%

Fund commentary

The market rebounded sharply in July on the back of strong H1 earnings publications and a Goldilocks scenario. The cyclical and banking sectors outperformed while defensives lagged the market. The fund performed well in July with performances driven by GTT and Worldline. In contrast, Teleperformance continued to weigh on performances, though the position was trimmed. The fund's exposure to other service industry players, including Publicis and WPP, was also reduced.

Net equity exposure

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KIID available on our www.sycomore-am.com website.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculated by Sycomore AM based from 2018 to 2021.

Coverage rate : fund 100% / index 98%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy

Coverage rate : fund 100% / index 99%

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.

Coverage rate : fund 100% / index 98%

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 97% / index 94%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 100% / index 99%

Gender equality ♀/ ♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate: fund 100% / index 99%

ExecComm cov. rate: fund 100% / index 100%

ESG follow-up, news and dialogue

Dialogue and engagement

Deutsche Telekom

We contacted Deutsche Telekom to check the lead exposure risk from the copper cables used in its landline telephone network. The company explained that the use of copper cabling was historical and that these cables had not been installed for the past 50 years. Less than 10% of the copper landline infrastructure, which is ISO-certified and complies with European regulation, could still contain some lead. None is to be found above-ground or in the water systems.

Worldline

Meeting held with Worldline on the company's ESG strategy. On the environmental front, the company has conducted a lifecycle analysis on payment solutions; the results will help Worldline identify the priorities for decarbonizing the value chain of its products. On the social front, our discussion was an opportunity to review the One Culture Program launched in 2021. Together with the company, we shall monitor any changes in governance relating to the Chair succession plan.

Investment strategy

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycomore Sélection Crédit aims to deliver financial returns above those of the Barclays Capital Euro Corporate ex-Financial Bonds (reinvested coupons) over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

Inception	0.5	0.5	1.7%	2.9%	3.3%	3.1%	0.8	0.4	-14.3%	-17.5%

Fund commentary

The Fed raised interest rates by 25 bp, as expected. The market is anticipating a final hike (with odds of 50%), but four or five 25 bp cuts in 2024, which we feel is an optimistic forecast. The ECB also raised its rates by 25bp. We are now seeing signs that monetary tightening is filtering through to the economy - for example, in the central bank's most recent quarterly survey on the declining demand for loans. Spreads narrowed during the month, supported by strong corporate earnings. The primary market has remained rather active on the Investment Grade segment. TDF, the telecoms infrastructure operator, issued a 5-year bond, rated BBB- by Fitch, with a 5.625% yield. DS Smith, the leading supplier of sustainable packaging, issued 4 and 7-year tranches. The longer duration bond came with a 4.60% coupon at issuance, which is an attractive yield in the current environment.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 27%

Investment strategy

Sycoyield 2026 is a maturity fund seeking yield opportunities in the bond markets. It invests mainly in high-yield corporate bonds issued in euros, with a maturity date mainly in 2026 and which are intended to be held until their maturity. The selection of issuers takes into account environmental, social and governance issues.

Performance as of 31.07.2023

According to the current legislation, we cannot disclose the performance of a fund that has a reference period of less than 12 months. For further information, please contact our team.

Fund commentary

The Fed raised interest rates by 25 bp, as expected. The market is anticipating a final hike (with odds of 50%), but four or five 25 bp cuts in 2024, which we feel is an optimistic forecast. The ECB also raised its rates by 25bp bringing the cumulative increase to 425bp. We are now seeing signs that monetary tightening is filtering through to the economy - for example, in the central bank's most recent quarterly survey on the declining demand for loans. Spreads narrowed during the month on the back of robust earnings publications. The automotive sector stood out, with better-than-expected guidance issued for H2 by car manufacturers and several equipment suppliers, including Forvia and Gestamp. The primary market has remained rather active on the Investment Grade segment. DS Smith, the leading supplier of sustainable packaging, issued 4 and 7-year tranches rated BBB-. The shorter duration bond came with a 4.40% coupon at issuance, which is an attractive yield in the current environment.
