Investment strategy

A responsible selection of French equities based on proprietary ESG analysis

Sycamore Francecap aims to outperform its benchmark index, the CAC All-Tradable NR, over a period of five years, through a multi-thematic and socially responsible investment process drawing from our proprietary "SPICE" methodology and economic and societal contribution indicators. The fund invests without sector or market capitalisation constraints in French equities we believe to be trading at a substantial discount. Depending on the manager's forecasts, a significant portion may be allocated to mid-caps.

Fund commentary

The US economy ended the year with a strong growth momentum (+3.3% in 2023). This positive data raised investors' hopes as the earnings season got under way. LVMH opened the season with a robust publication that was well received by the market. Sales are up 9% over the year, with a stable operating margin. Within the portfolio, top performers in January included Antin, after the company recovered from a challenging year in 2023 on the fundraising front. Nexans also enjoyed a strong rebound, supported by improved visibility on the launch of offshore wind projects in the United States. Worldline featured among top detractors, shedding over 10% despite the announcement that Credit Agricole had acquired minority stakes in the company. Investors remain wary of the management team after the financial communication disasters of 2023.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

Dialogue and engagement

STMicroelectronics

We asked STMicroelectronics to provide more transparent information on weightings, trigger points, targets and achievements on its criteria relating to short and long-term executive remuneration. We notably encouraged the company to assemble information on the annual ESG criteria achievement ratios within the proxy.

Elis

We took advantage of a recent meeting with management to discuss the group's climate strategy, which was updated in September 2023. This policy is based on three pillars: optimisation of industrial processes, products, transport. We particularly appreciate Elis' strategy aimed at extending product life, thanks to an adapted maintenance and repairs policy.
