### Investment strategy

#### A responsible selection of French equities based on proprietary ESG analysis

Sycomore Francecap aims to outperform its benchmark index, the CAC All-Tradable NR, over a period of five years, through a multi-thematic and socially responsible investment process drawing from our proprietary "SPICE" methodology and economic and societal contribution indicators. The fund invests without sector or market capitalisation constraints in French equities we believe to be trading at a substantial discount. Depending on the manager's forecasts, a significant portion may be allocated to mid-caps.

### Fund commentary

Donald Trump's election in the US caused European markets to fall as investors fear a tougher trade war and its implications for inflation and (rising) interest rates. In this environment, financial, automotive and high-debt companies suffered. Trump's intention to deregulate banks further also weighed on the sector in Europe. Boiron retreated during the month after announcing a new restructuring plan in response to the continued drop in sales for its non-proprietary homeopathic medicines. Saint-Gobain confirmed the further improvement of its operating margin in 2024, despite a slowdown in volumes, and rose during the period. Wendel reported a fully diluted net asset value up 16% year-to-date and also performed well.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

We discussed the massive redundancies recently announced by other auto sector players in Europe with the Chairman of the Board. The company has sent out a reassuring message, indicating that the issue was not on the agenda of the talks held between management and trade unions.

Engie

As part of our engagement initiative with Climate Action 100+, we held discussions with Engie's CSR and RI team on the groundwork for its Climate Plan, due to be put to the shareholders' vote at the AGM in 2025. These talks were an opportunity to voice our expectations on the alignment of Engie's investments with its 1.5°C objective, and to question the company on the feasibility of some of the targets (green gas) and on the role of carbon offset credits within the group's strategy.
