Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

Donald Trump's re-election on November 5th boosted capital markets in the US, with investors expecting lower taxes and greater deregulation. This euphoria did not spread to Europe, where markets retreated amid high volatility, impacted by geopolitical tensions in the Middle East, rising yields, and political uncertainties - notably regarding the tariffs likely to be implemented by the US. These factors weighed on returns in sectors such as energy, utilities and finance. On the corporate side, the bright spot in November was Nvidia after the company beat earnings expectations, however, guidance issued for the next few months was perceived as rather conservative. The equity envelope performed well relative to European markets thanks to its diversification into the US. After Trump's victory, we dialled up our exposure to US equities and increased the equity pivot from 50% to 54%, with the purchase of US equities. This included introducing Darling Ingredients - a company that collects and recycles oil to produce biofuel - to the portfolio and should benefit from a favourable regulatory and pricing environment.

Renault

During our talks with management, we addressed the difficulty, for car manufacturers, to attain the CAFE standards in 2025 (emissions criteria for CO2/km/vehicle sold) in light of weak sales within the EV segment. To avoid being fined, car manufacturers may have to lower the price of EVs and/or cut their production of combustion-engine cars, and/or purchase carbon credits from US or Chinese car industry players.

ESG controversies

Renault

We discussed the massive redundancies recently announced by other auto sector players in Europe with the Chairman of the Board. The company has sent out a reassuring message, indicating that the issue was not on the agenda of the talks held between management and trade unions.
