**Investment strategy**

**A stock picking fund with exposure to equities ranging between 0 and 100%**

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

**Fund commentary**

European markets were faced with political instability in France following the vote of no confidence that brought down the Barnier government, but also in Germany, with early elections in March. Central banks lowered their rates, but the cut was kept to the minimum in Europe and came with restrictive rhetoric in the United States. Capital markets were therefore under pressure on both sides of the Atlantic, causing long-term yields to rise in the United States. Interest rate-sensitive sectors were affected, with real estate and healthcare slipping while banks rose during the month. The portfolio suffered from its exposure to the healthcare sector, notably via Novo Nordisk (disappointing clinical trial results). Our diversification into US equities also weighed on performances (Darling Ingredients, Clean Harbors, and United Rentals). Conversely, technology - notably in the US - contributed positively to performance. After a very strong run, Saint-Gobain was removed from the portfolio owing to the company's high sensitivity to the political situation in France.

## ESG follow-up, news and dialogue

---

### Dialogue and engagement

#### Nvidia

We participated to Nvidia's quarterly Human Rights investor call during which they mentioned they were finishing their Human Right Impact Assessment. However they don't seem to be able to track the end-users (including in conflict areas) of their products at the moment. The company shall publish more elements on this aspect in June 2025.

#### Prysmian

We were contacted by Prysmian for feedback on their double materiality assessment. We made recommendations in the following areas: health and safety indicators, circular economy, measures in place to prevent violent behaviour and harassment at work, as well as materiality, the calculation, reporting and definition of scope 3-related targets.

### ESG controversies

#### Microsoft

In the United States, the Federal Trade Commission is investigating Microsoft in a wide-ranging probe into the company's products, from Cloud to AI, after several cybersecurity incidents involving the group.

### Votes

**0 / 0** voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
