Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%
Sycomore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

The month of October was characterised by geopolitical risk, energy market tensions and elevated rates, although the latter eased towards month-end. Markets also experienced volatility around the AI theme, with semiconductors correcting ahead of tech earnings. Against this backdrop, we actively managed technology exposure through Nasdaq hedges, enabling us to increase equity exposure following the month-end sell-off. Bureau Veritas was the fund's leading contributor after raising growth targets and delivering strong earnings. Novonesis benefited from its share buy-back programme, while Microsoft gained support from Azure. Conversely, technology stocks, particularly Korean semiconductors, and industrials weighed on performance. Eugene Technology and SK Square were affected by AI de-risking, while Argenx declined after a clinical trial closure. We initiated Kimberly-Clark and increased Schneider Electric, financed by profit-taking on Bureau Veritas and European banks and reduced exposure to ASML, STMicroelectronics and Korean AI-related stocks.
