## Investment strategy

### A stock picking fund with exposure to equities ranging between 0 and 100%

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

### Fund commentary

The economic headlines were rather mixed in September, with a timid recovery in the Eurozone driven by Germany and a labour market slowdown in the US. The much-awaited rate cut by the Fed fuelled the stock market rally, with several members suggesting that other cuts could follow if the data allows. In contrast, long-term rates in the UK reached their highest level in 27 years, bonds faltered, and gold hit new records amid great uncertainty. The portfolio benefited from its exposure to technology (ASML) and to industrials (Prysmian and Bureau Veritas). The relative strength of the US economy, growing investment in AI, the pro-cyclical effects of deregulation, and the Fed's rate cuts will support growth and have encouraged us to raise our equity allocation to 48%. We therefore purchased exporting companies benefiting from the tariff agreements (AstraZeneca, Novartis, Hermès) as well as selected technology players (Microsoft, ASML). We also took advantage of Wendel's disposal of Bureau Veritas shares to strengthen our position.
