Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycomore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

Equity markets, notably in Europe, started the year with a bang, boosted by Trump's inauguration. Towards the end of the month, the emergence of DeepSeek - a Chinese start-up, shook up the technology sector. The company's AI model, developed at a low cost, sent Nvidia's stock price tumbling. This innovation is calling into question the massive investments in AI. Central banks continued their monetary easing, which did not prevent long-term rates from rising, driven by growth prospects and the emergence of a term premium. This had a substantial impact on rate-sensitive sectors: negative for real estate and utilities, and positive for financials. The move benefited our equity portfolio on account of its exposure to Italian and Spanish banks. The fund's exposure to healthcare also contributed positively. Conversely, Vonovia, the real estate company, was affected by rising interest rates. Arcadis suffered from the news flow on DeepSeek. Few movements were made during the month, though our position in Renault's redeemable shares was trimmed after a strong run.
