Investment strategy

A stock picking fund with exposure to equities ranging between 0 and 100%

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

Fund commentary

Driven by Tech and AI, US equity markets - also supported by robust corporate earnings - hit record highs in July. After Japan, Europe signed a trade agreement with the United States (15% tariffs) that eased investors' fears but weighed on the Euro. The portfolio benefited from this favourable environment via its diversification into AI-related tech players (Synopsys, MongoDB, Nvidia) and Assa Abloy's robust earnings publication. On account of rather muted trade agreements - with tariffs that remain at 15% - and markets at all-time highs, we have kept our equity allocation at around 45%. Our active stock picking approach involved some profit taking on US tech players (Nvidia, Synopsys) and reallocation into companies exposed to the German infrastructure plan (Elia, Aurubis) or due to rebound after the signing of trade agreements (Hermès, ASML) and benefit from the easing of financial regulation (JP Morgan, BNP Paribas).
