**Investment strategy**

**A stock picking fund with exposure to equities ranging between 0 and 100%**

Sycamore Partners is a concentrated stock picking fund whose exposure to equities may range between 0 and 100%. The fund aims to achieve superior returns over a minimum investment horizon of five years by applying a thorough stock selection process based on the fundamental, in-depth analysis of European and international stocks, incorporating strict ESG criteria. In addition, the fund's exposure to stock markets is managed according to an opportunistic and discretionary approach. The fund seeks to exclude companies displaying significant ESG risks and focuses on those driven by sustainability considerations and that appear clearly committed to shifting towards more sustainable economic models.

**Fund commentary**

Markets extended their rebound in May despite the mixed environment. The positive earnings momentum, AI and related infrastructure capex drove equity markets higher, while tensions around the Strait of Hormuz, long-term rates, and inflation fuelled underlying volatility. The fund rose thanks to its exposure to technology stocks and beneficiaries from AI and electrification-related capex. Infineon and Prismsian were the main performance drivers, thanks to robust demand from hyperscalers, semiconductor companies and energy players. Conversely, GDS and Eaton weighed on performance, despite their robust fundamentals. Considering the uncertain outcome of current peace negotiations, we have continued to manage our equity allocation tactically at around 50%, with adjustments made via derivatives: beta is lowered in periods of caution, then raised when the market scenario turns more favourable. In terms of portfolio activity, we have continued to diversify our holdings outside of pure AI, by strengthening Novonosis and Thales. These stocks add exposure to industrial and environmental growth drivers and offer strong visibility and superior business models.
