Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

The government shutdown in the US left market observers flying blind without access to most economic data this month, ahead of a possible rate cut at the Fed's next meeting. Despite Nvidia's robust earnings publication, the technology sector remained under pressure during the month, posting negative returns. Our convictions within the pharmaceutical sector, including AstraZeneca and Eli Lilly, delivered strong gains. In the fixed income envelope, credit spreads remained stable overall during the period, while the yield curve steepened a little on longer-dated sovereign bonds. The fund's equity exposure fluctuated between 27% and 32% during the month.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure: 26%

ESG follow-up, news and dialogue

Dialogue and engagement

SAP

We held discussions with the company on its use of Al, governance around this theme, and the transparency of the information supplied.

ESG controversies

Airbus

The French Human Rights League has issued a formal notice to Airbus Atlantic for allegedly failing to publish a vigilance plan for 2025. The league considers that the scattered information supplied in the 2024 annual report falls short of legal requirements.

Votes

1/1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM Here.

Sanofi

Sanofi has greatly improved its gender diversity practices: the company has set up ambitious targets and a non-gender based parental leave, and has partly tied the CEO's remuneration to key performance indicators on diversity. While the executive committee still does not meet all legal requirements, the rate of internal promotion and the integration of diversity & inclusion into the corporate culture are clearly positive factors.

Stellantis

Jeep Wrangler and Grand Cherokee have recalled 320,065 products following an accident in the United Staes.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determing factor. Marketing communication.
