Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

In October, financial markets navigated a more volatile environment amid persistent geopolitical uncertainty. Inflationary pressures stemming from higher energy prices, together with concerns over sovereign creditworthiness, continued to put upward pressure on government bond yields. The resilience of the US economy also led investors to reassess their expectations regarding the pace of monetary easing. In Europe, a weaker economic backdrop and fiscal concerns weighed on sentiment. Equity markets became more selective, particularly within technology stocks following their strong performance. Towards the end of the month, we rebuilt our exposure to the sector. In credit markets, spreads widened, although primary issuance remained robust. Finally, third-quarter earnings were broadly solid, but revealed increasing divergences across sectors and companies.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.** **The fund has committed to outperforming the Euro Stoxx on these two indicators. The other indicators are shown for illustrative purposes.** All indicators mentioned are calculated on the invested portfolio (excluding cash, derivatives, and mutual funds).

Sustainable development goals exposure

This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies' effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.
A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.
For more details, our annual SRI report is available in our ESG documentation.

No significant exposure :	**57%**	*% of companies with no exposure (neutral)*
Non-alignment :	**5%**	*% of companies misaligned or strongly misaligned*

ESG follow-up, news and dialogue

Dialogue and engagement

Thalès
We engaged Thalès as part of an investor coalition to discuss the use of their products and their impact for human rights.

Banco Santander
During talks with Santander, we discussed how the ONE Transformation plan and the deployment of AI would impact labour. In Spain, restructuring plans are based on social dialogue, unlike in the UK or the US where the emphasis is more on attrition. The group has remained rather vague on redeployments and departures. Reliance on AI is expected to generate gains of €1 billion over 3 years, but the impact on labour, skills and governance is yet to be specified.

ESG controversies

Roche Holding
On October 8th and in agreement with the European Medicines Agency, Roche Holding sent a Direct Healthcare Professional Communication regarding a new risk of drug-induced liver injury associated with Ocrevus. The letter also included new surveillance recommendations.

Canal +
Canal+ is under investigation for abuse of a dominant position on film approval clauses during 2021.
