### Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

### Fund commentary

Eurozone sovereign yields retreated on growing expectations of ECB rate cuts in 2025, while long-term yields in the US reverted to their end-October level of 4.25%, after peaking at 4.5% during November. After rising stress over the political situation in France, the risk premium on French rates eased in the second half of the month. Credit spreads widened slightly on the BBB segment but narrowed in HY. The cable company Prysmian issued a 7-year bond with a BBB- rating bearing a coupon close to 4%, the proceeds of which will fund a takeover in the US. We took part in this issuance. Within the equity envelope, Europe underperformed the US where markets were boosted by the positive momentum that followed the election of Donald Trump. We have gradually increased the US equity envelope over the past few weeks, at the expense of European equities. Leading contributors to performance in the US were JP Morgan, T Mobile and Mastercard and in Europe, Deutsche Telekom and Publicis. In contrast, European financials weighed on the fund's performance during the month.

## Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

**No significant exposure : 24%**
