Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

The ongoing crisis in the Middle East drove crude oil and gas prices higher, with some products such as gasoline even more heavily impacted owing to the global shortage of refining capacities. This has added further pressure on inflationary risks at a time when the race for capital is becoming intense, marked by large issuance volumes from both sovereign and corporate issuers. The impact on yield curves has been substantial with a sharp upward parallel shift during the month. The spread on French sovereign bonds continued to widen, while French equities underperformed. Credit spreads remained stable overall but could be impacted if the movement in rates markets were to continue. We lowered the duration in our bond portfolio. Within the equity envelope, our investments in technology continued to rally.

This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies' effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.
A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.
For more details, our annual SRI report is available in our ESG documentation.

No significant exposure :	**56%**	*% of companies with no exposure (neutral)*
Non-alignment :	**5%**	*% of companies misaligned or strongly misaligned*

ESG follow-up, news and dialogue

Dialogue and engagement

Clariane
We questioned Clariane over the system used to verify the data feedback from employees, which is then cross-referenced using several sources based on audits. Clariane has also developed a training system for its care home managers via its corporate university. The training is designed to help managers embrace and embody the group's core values and ultimately improve the quality of care.

Airbus
We asked Airbus for more details on their pre-sale client verification procedure. However, the company has not yet developed or implemented the means necessary to monitor the downstream use of its products. Pre-checks in conflict-ridden areas are integral to the assessment performed upstream.

ESG controversies

Microsoft
In Spain, allegations have been made over asbestos-related risks and improper disposal of waste during the construction of a data center.

Veolia
The Basque Country Community and Suez Eau Gaz were charged for the illicit discharge of wastewater into the Atlantic Ocean since 2017.
