Investment strategy

Sycomore Allocation Patrimoine, is a feeder fund of Sycomore Next Generation, sub-funds of Sycomore Funds Sicav (Luxembourg). Sycomore Next Generation is a flexible, multi-asset SRI fund that combines Sycomore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

Strikes on Iranian military and nuclear sites caused volatility to peak across oil and European equity markets. Despite high tensions on the US budget and its impact on the dollar, US equity markets rallied during the month. We were active on the corporate bond segment which offered many primary issuances. The fund's equity exposure moved between 25% and 30% during the month. Within the portfolio, telecoms, healthcare and luxury stocks fell back but the technology sector rose sharply, both in Europe (ASML, Infineon) and in the United States (Alphabet, Microsoft, Nvidia). We have continued to hedge 50% of our dollar exposure.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 99% / index 99%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%. **The fund has committed to outperforming the Euro Stoxx on these two indicators. The other indicators are shown for illustrative purposes.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

BNP Paribas

We engaged BNP Paribas on issues relating to human capital, and notably corporate culture, talent acquisition and retention, equity and headcount growth.

Saint-Gobain

We discussed Saint-Gobain's preference for aligning with the CS3D reporting standards rather than the French vigilance plan. We also informed the company that several items relating to the monitoring and audits of the corrective measures policy were missing. As far as war zones are concerned, Saint-Gobain has implemented a strengthened due-diligence policy, however, in Russia, controls on reporting are minimal owing to the conflict, hindering accountability on several aspects.

ESG controversies

Microsoft

Several new controversies relating to confidentiality and data protection issues have emerged in the US and Ireland. Claims suggest that Microsoft is also planning further job cuts, principally in its sales department, as part of a wider restructuring related to artificial intelligence.

EDP

The investigation into the power outage in Spain that took place in April 2025 is at a standstill, as companies have refused to share essential information.

Votes

6 / 7 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
