Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

Volatility in Eurozone equity markets rebounded sharply during the month, as political risk made a surprising comeback (together a risk of fragmentation in the euro area, according to pessimists) following the French President's decision to call an early election. Financial stocks (largely underweight in the portfolio) were logically the first to suffer from investor withdrawals, as were small and mid-caps (market caps below €6 billion do not feature in our portfolio) and several French companies potentially threatened by the far-right party's historical political program (Vinci, Eiffage, Engie, also not in the fund). We did not panic but the portfolio's exposure to France was nevertheless reduced - principally via Axa and Veolia - and we strengthened Germany via Siemens and Deutsche Telekom. Convinced that this political crisis will offer attractive entry points over the next few weeks, we have kept our cash reserves higher than usual. These liquidities can be deployed very quickly to seize any opportunities that may occur.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.6/5
S score	3.6/5	3.4/5
P score	3.6/5	3.6/5
I score	3.8/5	3.7/5
C score	3.8/5	3.6/5

Environmental analysis

Net Environmental Contribution (NEC) **

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données des années 2018 à 2021.

Coverage rate : fund 100% / index 99%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy

Coverage rate : fund 100% / index 100%

Temperature rising - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.

Coverage rate : fund 99%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.

Coverage rate : fund 100% / index 99%

	Fund	Index
kg. eq. CO ₂ /year/k€	109	152

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Biodiversity footprint

Artificialised surface area in m² MSA per k€ invested***, measured by the Corporate Biodiversity Footprint. Mean Species Abundance (MSA) is assessed in comparison with the original state of the environment.

Coverage rate : fund 100% / index 97%

	Fund	Index
m ² .MSA/k€	-37	-54

Societal and social analysis

Societal contribution**

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 99%

Human rights policy

Percentage of portfolio companies that have drawn up a Human Rights policy.

Coverage rate : fund 100% / index 98%

Gender equality ♀/♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate : fund 97% / index 92%

ExecComm cov. rate : fund 99% / index 96%

The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 19%

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

During our recent meeting with management, we discussed the circular economy within the group: 85% of the components used for vehicles manufactured by the group can be recycled. The percentage of recycled materials used in new vehicles is only 30%, as recycled materials sometimes fail to meet the technical resistance standards imposed by the group's safety criteria. Aluminium was cited as an example.

ESG controversies

L'Oréal

We held discussions with L'Oréal following the release of a BBC documentary revealing the presence of child labour in its value chain. The documentary claims that children are involved in the harvest of jasmine, used for its essential oil in a Lancôme perfume. L'Oréal had already identified potential child labour issues as early as 2023 and has set up a remedial action plan. The group has contributed to the creation of a coalition led by an NGO and the ILO to eradicate child labour in this type of harvest.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Intesa Sanpaolo

We discussed with management the accounts transfers from Intesa Sanpaolo to Isybank. Last year, there were 1,500 claims after the move of 300,000 clients. 350,000 further clients were transferred a few months ago, without any significant number of claims: since then, processes had been improved, with a paper mail sent to all the targeted clients, even though they had indicated that they wanted to have e-mail only notifications. The group targets to transfer a total of 4 million accounts.

LVMH

In early June, an Italian court put a company owned by the Italian subsidiary of the French fashion house Christian Dior into administration, on claims that it had subcontracted production to Chinese companies accused of using forced labour. According to the court document, the company had failed to take "appropriate action to check the real working conditions or technical capabilities of the contracting companies". We plan to initiate a dialogue with LVMH.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
