Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

In August, Eurozone equity markets rose to record highs, supported by robust H1 earnings publications and the Fed Chair's speech at Jackson Hole, which opened the door to a potential rate cut in the US as early as September. This favourable environment was nevertheless disrupted by the return of political risk in France after the Prime Minister called for a vote of confidence among members of Parliament. This latest development caused the relative performance of domestic players (which had risen sharply year-to-date) and exporting companies (overlooked due to uncertainties over US tariffs) to shift dramatically. In this environment, the fund's under-performance at the beginning of the month was largely offset by its under-exposure to financials (strengthened mid-August via profit taking on Munich Re and Société Générale) and over-exposure to industrials and luxury stocks (also accentuated after we strengthened Prysmian, Hermès, Richemont and LVMH).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

Siemens Healthineers

We have reached out the company after a letter sent to the ANSM (Agence Nationale de Sécurité du Médicament) regarding potential safety issue associated with the helium exhaust lines of 3 Tesla MRI system magnet. We will soon meet management and will ask them further information on this topic.

Novo Nordisk

Novo has recently received an FDA Form 483 at the Bloomington, Indiana, facility after a FDA agency inspection of the site in late June and July regarding contamination from cat hair, bacteria, and foreign particles. In an emailed statement, a Novo Nordisk spokesperson confirmed receipt of the Form 483 and wrote that the company considers adherence to good manufacturing practice guidelines a "top priority."
