Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

Eurozone equity markets continued to rebound in September, lifted by rate cut expectations in the United States and easing political risk in France following the appointment of a new Prime Minister. Cyclical outperformed by a wide margin (including industrials, semiconductor players and banks), reflecting investors' hopes for stronger global economic growth over the next few months. Defence and artificial intelligence plays stood out, with Thales, Airbus, Schneider Electric, Legrand and Prysmian posting some of the strongest performances within the portfolio during the month. In terms of our investment strategy, despite some profit taking on ASML, Legrand, Siemens and Société Générale, the portfolio has kept its cyclical bias (notably exporting companies) with an over-exposure to industrial, automotive and luxury players.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

Environmental analysis

Net Environmental Contribution (NEC) **

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the [\(nec-initiative.org\)](#) based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.
Coverage rate : fund 100% / index 98%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.
Coverage rate : fund 100% / index 99%

Category	Value
Fund	6%
Index	7%

Carbon intensity of sales **

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.
Coverage rate : fund 97% / index 91%

	Fund	Index
kg. eq. CO ₂ /k€	641	976

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Category	Value
Fund	74%
Index	63%

Legend: 2°C (green), Well below 2°C (dark green), 1.5°C (dark green)

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Category	Value
Fund	0%
Index	3%

Legend: Coal (black), Oil (dark grey), Gas (light grey)

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.
Coverage rate : fund 100% / index 98%

Human rights policy

Percentage of portfolio companies that have drawn up a Human Rights policy.
Coverage rate : fund 100% / index 98%

Category	Value
Fund	100%
Index	99%

Gender equality ♀/ ♂

Percentage of women in total company headcounts and executive committees.

ExecComm cov. rate: fund 100% / index 100%

Category	Value
Fund	38%
Index	27%

Legend: in staff (dark grey), in ExecComm (light grey)

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 20%

ESG follow-up, news and dialogue

Dialogue and engagement

EssilorLuxottica

During a meeting with management, we discussed the group's greenhouse gas reduction targets which were approved by SBTi at the end of 2024, notably regarding scope 3 (-25% between 2022 – when Grandvision was full incorporated – and 2030). Scope 3 accounts for 75% of the group's overall emissions. EssilorLuxottica has already set up an engagement policy with its main suppliers. The latter account for 70% of its procurement (in value).

Novartis

In a recent meeting with management, we mentioned the potential impact of new regulation that could emerge in the United States to reduce the cost of prescription drugs. The US market accounts for 42% of Novartis' sales. For the time being, it appears that the price cuts only concern Medicaid, which accounts for around 10% of the company's US sales (versus 35% for Medicare). The impact is therefore likely to be rather limited.
