Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycomore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

Eurozone equity markets continued to rise, hitting new highs despite the concerns caused by the geopolitical environment. This optimism, which stems from the prospect of Eurozone companies generating earnings growth in 2026 (after three flat years), was accentuated when the earnings season kicked off. Our fund continues to focus on these growth stocks (notably semiconductor equipment companies, defence players, electrification and luxury companies). Conversely, the sharp rerating posted by Value stocks in 2025 is prompting us to be more cautious and selective, notably within the financial industry. In keeping with this positioning, we initiated a new position in ASMi and strengthened our holdings in Hermès, l'Oréal and Safran. In contrast, Novo Nordisk was removed the portfolio after the stocks' recent rebound.

Country breakdown

Market cap breakdown

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

	Fund	Index
SPICE	3.7/5	3.6/5
S score	3.5/5	3.4/5
P score	3.8/5	3.7/5
I score	3.8/5	3.7/5
C score	3.7/5	3.5/5
E score	3.5/5	3.3/5

Environmental analysis

Net Environmental Contribution (NEC) **

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 100% / index 99%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 100% / index 100%

Fund

Carbon intensity of sales **

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.

Coverage rate : fund 100% / index 99%

Fund	Index
kg. eq. CO ₂ / k€	820

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Fund

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by MSCI.

Fund

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 99%

ExecComm cov. rate: fund 100% / index 100%

Fund

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 22%

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

We engaged with Renault as part of the "Fair Transition" initiative. We presented our engagement initiative. The group is keen to receive feedback on the interest shown by investors on ESG issues concerning Renault. The company also underscored the difficulties experienced with MSCI, which is flagging up more controversies for Renault than for its competitors.

ESG controversies

No comment

Votes

0 / 0 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Iberdrola

We met with Iberdrola's management team to discuss ESG issues. The topics raised included water management, the company's installed capacity, and the reduction of scope 3 emissions.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
