Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycamore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

The fund closed the year on a positive note, outperforming its benchmark by a wide margin in 2024. Despite the widespread sentiment of "doom and gloom" for the region and sluggish economic growth, these performances demonstrate that it is possible to deliver high returns by investing in the capital of Eurozone companies, based on a conviction-driven approach supported by strict financial and extra-financial criteria. This approach has enabled us to seize investment opportunities at very early stages in companies considered to be undervalued at the time, such as Prysmian and Renault - the two leading contributors to performance in 2024, up by 50% and 30% respectively. As we head into 2025, despite Eurozone equity valuations starting the year at reasonable levels (notably relative to their US counterparts), strict selection and flexibility will be essential to navigate an economic and political environment which is likely to remain rather challenging.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.5/5
S score	3.5/5	3.3/5
P score	3.7/5	3.7/5
I score	3.8/5	3.7/5
C score	3.8/5	3.5/5
E score	3.4/5	3.3/5

Environmental analysis

Net Environmental Contribution (NEC) **

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.
Coverage rate : fund 100% / index 98%

European taxonomy

Share of EU taxonomy-eligible company revenues provided by MSCI.

Coverage rate : fund 100% / index 99%

Temperature rise - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.

Coverage rate : fund 100%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.***

Coverage rate : fund 90% / index 99%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Biodiversity footprint

Artificialised surface area in m² MSA per k€ invested***, measured by the Corporate Biodiversity Footprint. Mean Species Abundance (MSA) is assessed in comparison with the original state of the environment.

Coverage rate : fund 93% / index 97%

Societal and social analysis

Societal contribution**

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 98%

Human rights policy

Percentage of portfolio companies that have drawn up a Human Rights policy.

Coverage rate : fund 100% / index 97%

Gender equality ♀/♂

Percentage of women in total company headcounts and executive committees.

Staff cov. rate : fund 97% / index 91%

ExecComm cov. rate : fund 99% / index 96%

Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 17%

ESG follow-up, news and dialogue

Dialogue and engagement

Prysmian

We were contacted by Prysmian for feedback on their double materiality assessment. We made recommendations in the following areas: health and safety indicators, circular economy, measures in place to prevent violent behaviour and harassment at work, as well as materiality, the calculation, reporting and definition of scope 3-related targets.

Sanofi

We discussed the impact of new manufacturing tools for the workforce and the measures set up by the group for impacted employees, notably in France, where a Job and Careers Management plan has been set up. Furthermore, in response to our questions on the impact of the Biosecure Act in the US, if it were to be adopted. The company indicated it was working on the issue but that the impact, if any, would be minor.

ESG controversies

Nexans/Prysmian

The Italian Competition Authority has announced the opening of an antitrust investigation targeting the main manufacturers of copper cables operating in Italy. The investigation was prompted by a leniency application submitted by one of the involved companies. These companies had allegedly coordinated pricing practices, aligning list prices and initial distributor discounts since 2005.

Votes

0 / 0 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
