Investment strategy

A responsible selection of Eurozone equities based on proprietary ESG analysis

Sycomore Sélection Responsable is a conviction-driven fund which aims to deliver financial returns above those of the EuroStoxx Total Return index over a minimum investment horizon of five years, by applying a multithemed socially responsible investment process (energy transition, health, nutrition, digital, etc.) in keeping with the United Nations' Sustainable Development Goals. The fund mainly invests in the capital of quality Eurozone companies, which benefit from sustainable development opportunities and whose intrinsic valuation is believed to be above their stock market value.

Fund commentary

Volatility in Eurozone equity markets rebounded sharply during the month, as political risk made a surprising comeback (together a risk of fragmentation in the euro area, according to pessimists) following the French President's decision to call an early election. Financial stocks (largely underweight in the portfolio) were logically the first to suffer from investor withdrawals, as were small and mid-caps (market caps below €6 billion do not feature in our portfolio) and several French companies potentially threatened by the far-right party's historical political program (Vinci, Eiffage, Engie, also not in the fund). We did not panic but the portfolio's exposure to France was nevertheless reduced - principally via Axa and Veolia - and we strengthened Germany via Siemens and Deutsche Telekom. Convinced that this political crisis will offer attractive entry points over the next few weeks, we have kept our cash reserves higher than usual. These liquidities can be deployed very quickly to seize any opportunities that may occur.

Country breakdown

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.6/5
S score	3.6/5	3.4/5
P score	3.6/5	3.6/5

The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

sycomore sélection responsable

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure: 19%

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

During our recent meeting with management, we discussed the circular economy within the group: 85% of the components used for vehicles manufactured by the group can be recycled. The percentage of recycled materials used in new vehicles is only 30%, as recycled materials sometimes fail to meet the technical resistance standards imposed by the group's safety criteria. Aluminium was cited as an example.

ESG controversies

L'Oréal

We held discussions with L'Oréal following the release of a BBC documentary revealing the presence of child labour in its value chain. The documentary claims that children are involved in the harvest of jasmine, used for its essential oil in a Lancôme perfume. L'Oréal had already identified potential child labour issues as early as 2023 and has set up a remedial action plan. The group has contributed to the creation of a coalition led by an NGO and the ILO to eradicate child labour in this type of harvest.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM $\underline{\mathsf{Here}}$.

Intesa Sanpaolo

We discussed with management the accounts transfers from Intesa Sanpaolo to Isybank. Last year, there were 1,500 claims after the move of 300,000 clients. 350,000 further clients were transferred a few months ago, without any significant number of claims: since then, processes had been improved, with a paper mail sent to all the targeted clients, even though they had indicated that they wanted to have e-mail only notifications. The group targets to transfer a total of 4 million accounts.

LVMH

In early June, an Italian court put a company owned by the Italian subsidiarity of the French fashion house Christian Dior into administration, on claims that it had subcontracted production to Chinese companies accused of using forced labour. According to the court document, the company had failed to take "appropriate action to check the real working conditions or technical capabilities of the contracting companies". We plan to initiate a dialogue with LVMH.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determing factor. Marketing communication.
