Investment strategy

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycomore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

Fund commentary

The Jackson Hole speech saw Jerome Powell deliver a message pointing in the direction of a likely rate cut for the next meeting, while the Federal Reserve is under significant pressure from Donald Trump. Credit spreads remained at low levels, against a backdrop of strong investor demand for the asset class, in both Investment Grade and High Yield. Conversely, political uncertainty in France against a backdrop of deteriorating public finances caused sovereign spreads to widen again. Against this backdrop, we trimmed some positions with less attractive yields than at the start of the year, with a view to a return to primary transactions in the first few weeks of September. Earnings releases for the first half of the year are ongoing, and at this stage the issuers in the portfolio have delivered consistently. The fund's duration remained stable.

Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes. All indicators mentioned are calculated on the invested portion of the fund (excluding cash, derivatives, and UCITS).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 28%

ESG follow-up, news and dialogue

Dialogue and engagement

Scor

We asked Scor about its diversity and inclusion policy. The group has not considered excluding DEI targets for US employees serving in management roles. Scor has set DEI targets as part of the remuneration package applicable to the CEO and to the executive committee. Scor also emphasised the efforts made to encourage more women to join the Boards of Directors of its subsidiaries. The company still has room for progress on issues of transparency.

ESG controversies

Stellantis

A judge has approved a class action lawsuit against 13 car manufacturers on account of presumed design faults in the remote keyless and on-board diagnostics systems that may have facilitated vehicle thefts.

Orange

Legal action was brought against Orange for alleged forced inactivity, professional discrimination and emotional distress caused to a female employee.
