# Investment strategy

#### A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycomore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

## **Fund commentary**

Euro sovereign rates remained rather stable in November. The risk premiums on French and Italian bonds fell back. Fears of a bubble forming on artificial intelligence caused volatility on risk assets to rise and spreads widened a little during the month. The market expects ECB rates to remain stable over the next few months. In contrast, hopes of rate cuts by the Fed proved volatile, with investors now expecting a rate cut at the December meeting, followed by two further cuts in 2026. The primary market remained dynamic, both within the Investment Grade and High-Yield segments. Eroski, the Spanish retail group - which operates as a cooperative - refinanced its debt with the issuance of a 5.5-year bond rated B1/BB- and bearing a coupon of 5.75%. In the US, telecoms operator Verizon issued a BBB rated hybrid bond yielding 4%, an attractive coupon in our view.

# Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.
