### Investment strategy

#### A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycamore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

### Fund commentary

The US and Iran have continued their talks aimed at reaching an agreement, causing fuel prices and interest rates to ease. In an environment that is now more conducive to investment, credit spreads narrowed during the month across all credit segments. Primary market activity was particularly dynamic in May, both for financial and corporate bonds. During the month, we took part in issuances by Maxima, Canal +, SPIE, Lutech and TMD Friction. The fund rose on account of its carry yield and easing interest rates. Duration fluctuated around 3.7 during the period. After interest rates fell, we strengthened our hedging strategy on the 2-year portion of the yield curve.

## ESG follow-up, news and dialogue

### Dialogue and engagement

#### Imerys

We discussed the company's incentive pay structure as annual targets are not clearly defined. The taxonomy remains limited with only two eligible activities and the exclusion of mines. In Glomel, claims are being contested and a probe has been launched. The Emili project is moving forward: the company has conducted a feasibility study and is now looking for a partner. The biodiversity strategy is based on 20 priority sites. Finally, concerns were raised over the credibility of the net zero 2050 target, with 2040 seeming more likely.

#### ESG controversies

##### Elior

Following the harmonization of internal rules, Elior Group is facing questions about the legal basis for several redundancies.

#### Maxima Grupe

We discussed the Group's environmental performance, which is progressing (greener energy, lower emissions, near-total recyclability of plastics, reduced waste). Governance remains focused. Supplier practices and employee well-being are well developed, despite high turnover. The range of healthy products remains limited. Traceability is progressing via our own brands, and no major changes have been reported in our real estate strategy.

#### Vodafone

Vodafone is accused by former franchisees of imposing excessive fines and cutting commissions.
