#### Investment strategy

#### A European selection of companies supporting the environmental transition

Sycomore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

#### **Fund commentary**

Political announcements set the pace for capital markets in March: Trump is seeking to set his tariffs, while Germany announced an ambitious package designed to boost defence and infrastructure spending. The market has interpreted this plan as a stimulus for growth in Europe and the fund outperformed the index by a wide margin, despite its absence from defence and oil stocks. We made a few arbitrage movements to raise our exposure to more defensive sectors. In this environment, we strengthened the portfolio's most defensive segments, notably the power grid play (via E.ON, Elia and Redeia) which offers visible growth and domestic exposure. Elia finally supplied details on its massive investment plan in the Belgian and German power grids, thereby derisking the future growth of the company. Furthermore, we lowered our exposure to European construction after the rebound triggered by the German announcements, amid rising 10-yields.

Performance contributors

Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating peletter. These 5 ratings are weighted based on the company!

#### Net Environmental Contribution (NEC)\*\*

Others

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the <a href="mailto:(nec-initiative.org">(nec-initiative.org)</a>) based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

#### Incucted temperature rise

In °C by 2100 compared to the pre-industrial era according to the Science-Based 2°C Alignment, SB2A methodology (source Iceberg Data Lab).

Coverage rate: fund 96%

\*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». https://www.ipcc.ch/assessment-report/ar6/

#### Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.\*\*\*

Coverage rate : fund 99% / index 100%

Fund Index kg. eq. CO ₂ /year/k€ 1118 778

#### Greenfin Breakdown

Companies breakdown according to their green revenues' content and to excluded activities as defined by the Greenfin certification and as estimated by Sycomore AM or audited by Novethic label Greenfin, estimated by Sycomore AM or audited by Novethic.

#### European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 100% / index 100%

Fund Index Aligned share 27% 5%

#### Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

#### **Biodiversity footprint**

Surface maintained artificially in  $m^2.MSA$  per  $k \in NSA$  invested\*\*\*, modeled by the CBF on scopes 1, 2, 3 upstream + downstream (IDL source) and expressed as normalized surface according to the average abundance of species.

Coverage rate : fund 100% / index 98%

Fund Index m².MSA/k€ -74 -47

#### Societal and social analysis

#### Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 96%

#### Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 99% / index 99%

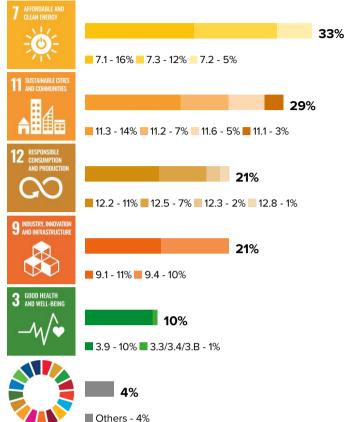

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.\*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.\*\*The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes. \*\*\*Footprint allocated prorata to enterprise value, cash included. (MSA= Mean Species Abundance / CBF = Carbon Biodiversity Footprint / IDL = Iceberg Data Lab).

# sycomore europe éco solutions

#### Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure: 9%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

#### ESG follow-up, news and dialogue

#### Dialogue and engagement

#### Elia

We had a call with power transmission system operator Elia to discuss their climate strategy (potential to raise current targets, to adopt a scope 3 target, visibility on concrete actions). A constructive dialogue overall. We were encouraged by the fact that the company should disclose a scope 3 target soon and has already set concrete actions to buy low-carbon grid equipment.

#### **ESG** controversies

#### Siemens

Siemens announced that it would cut 5,600 jobs at its Digital Industries business. This concerns 8% of the divisional workforce and aims to adjust to weak market conditions in Germany and China.

#### Votes

7 / 7 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM  $\underline{\mathsf{Here}}.$ 

#### Veolia

Veolia will unveil its non-financial performance on March 31st. On the climate front, we shared our expectations for content and requested clarification on 1) whether the 2032 reduction pathway refers to absolute emission levels; 2) the scope of emissions covered by the net zero target; 3) the date of the 2030 European coal phase-out; 4) additional investments; and 5) the carbon offset practices under consideration for achieving the zero carbon objective.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determing factor. Marketing communication.
