A European selection of companies supporting the environmental transition

Sycamore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Fund commentary

The ceasefire agreed on April 8th, and the current peace talks between the United States and Iran significantly eased investors' concerns, allowing European equity markets to rebound and wipe most of the losses recorded in March. In April, the fund extended its year-to-date outperformance thanks to robust stock picking within the technology sector, as stocks exposed to the semiconductor value chain continued to rally, lifting our positions in ASML and especially Infineon, after the stock soared by 40%. The strong momentum around electrification and data centers also supported Prysmian, Schneider and Munters. Befesa enjoyed a substantial rebound owing to high zinc and aluminium prices, while Aurubis benefited from the tensions on sulphuric acid - as 30% of production is based in the Middle East - and from Papenburg's direct acquisition of stakes in the company, which has reinforced speculation around the stock. By contrast, the fund suffered from a further profit warning from Alstom, the world's leading rail specialist, confirming the group's industrial execution difficulties. This prompted us to trim our position despite the robust outlook for the rail industry.

ESG follow-up, news and dialogue

Dialogue and engagement

Antofagasta

We initiated an exchange on sustainability topics with Antofagasta. Discussions covered corporate culture, health and safety, IED and compensation. The company is constructive and highlighted several good human capital practices, including zero fatal accidents and benefits that often exceed legal requirements in Chile. On the environmental front, SBTi submission, Scope 3 framing and TNFD progress were discussed.

Danone

We continued our collaborative dialogue with Danone on the subject of just transition. The exchange enabled us to make a very positive assessment of the 2025 objectives of the Danone Impact Journey and to present the 2030 roadmap around Health, Nature and People. The main obstacles concern regenerative agriculture outside Europe and the regulatory framework for plastics.
