Investment strategy

A European selection of companies supporting the environmental transition

Sycamore Europe Eco Solutions invests in listed European companies across the entire market capitalisation spectrum. The fund focuses on companies with business models that support the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Performance as of 28.02.2025

Fund commentary

The European market continued to rise, undeterred by the political and geopolitical turmoil. Sustainable construction stocks rose sharply, supported by hopes of a ceasefire in Ukraine, a coalition government in Germany, and better earnings publications that could suggest a recovery - albeit moderate - in 2025. The semiconductor segment (Infineon and STM) also performed well as demand from end-market players within the automotive and industrial sectors is finally starting to recover, after a challenging period. Power equipment suppliers experienced sharp movements throughout the month: while on the one hand, earnings and guidance tended to be excellent (Schneider Electric, ABB, Legrand), on the other, fears that Microsoft may lower its AI investments triggered a major retreat. However, companies reassured investors on their order books and the outlook for the segment, where supply shortages persist as the market struggles to keep up with fast growth in the coming decade. Electrification and power infrastructure continue to rank among our favourite environmental themes. In this environment, we have strengthened Siemens, which is continuing to optimise its business portfolio, as well as a few cyclical laggards (Infineon, Befesa) and a selection of more defensive plays (EON, Redeia).

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.8/5	3.4/5
S score	3.6/5	3.2/5
P score	3.7/5	3.6/5

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Greenfin Breakdown

Companies breakdown according to their green revenues' content and to excluded activities as defined by the Greenfin certification and as estimated by Sycomore AM or audited by Novethic [label Greenfin](https://www.novethic.com), estimated by Sycomore AM or audited by Novethic.

Incuted temperature rise

In °C by 2100 compared to the pre-industrial era according to the Science-Based 2°C Alignment, SB2A methodology (source Iceberg Data Lab).

Coverage rate : fund 97%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.***
Coverage rate : fund 89% / index 94%

	Fund	Index
kg. eq. CO ₂ /year/k€	648	784

Carbon emission reductions**

Percentage of portfolio companies that have defined carbon emission reduction commitments.
Coverage rate : fund 98% / index 98%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 100% / index 100%

	Fund	Index
Aligned share	27%	4%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Biodiversity footprint

Surface maintained artificially in m².MSA per k€ invested***, modeled by the CBF on scopes 1, 2, 3 upstream + downstream (IDL source) and expressed as normalized surface according to the average abundance of species.

Coverage rate : fund 89% / index 92%

	Fund	Index
m ² .MSA/k€	-72	-48

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 96%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 99% / index 98%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included (MSA= Mean Species Abundance / CBF = Carbon Biodiversity Footprint / IDL = Iceberg Data Lab).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 9%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

ESG follow-up, news and dialogue

Dialogue and engagement

Nexans

Our recent talks with Nexans' management team regarding the company's outlook for the next few years confirmed the group's commitment to its E3 strategy - Economy, Environment and Engagement.

ESG controversies

Veolia

A dispute with Veolia over the non-recognition of members of the Unite trade union in the UK has led to industrial action.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Séché Environnement

In a recent meeting with Séché Environnement, the company presented its PFA processing-related activities. With the upcoming revision of Europe's REACH regulations, these activities could grow substantially in the years to come.

Veolia

The Veolia group was also mentioned in the press for unreported malfunctions that led to the release of ferric chloride into the Durance river.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
