Investment strategy

A responsible selection of people-driven European companies

Sycamore Europe Happy@Work invests in European companies that pay particular attention to the importance of human capital as a key performance driver. The fund seeks to contribute positively to the human capital issues highlighted in the United Nations' Sustainable Development Goals. Stocks are selected on the basis of rigorous fundamental analysis combined with in-depth ESG research, focusing on a company's ability to promote employee fulfillment and engagement, using a proprietary assessment framework. The analysis draws from the experience and knowledge of field experts, human capital managers and employees. Fund managers also carry out on-site visits. The fund seeks to outperform the Euro Stoxx TR index over 5 years.

Fund commentary

December 2024 has been an eventful month for global equity markets. The Federal Reserve's recent decision to cut interest rates by 25 basis points in December 2024 has had a notable impact on global equity markets. This move, which lowered the target interest rate range to 4.25%-4.5%, was aimed at supporting the labor market and achieving price stability. Initially, the markets reacted negatively, with a nearly 3% drop following the announcement. However, this correction was short-lived, and markets began to recover as investors adjusted to the new rate environment. The Fed's indication of a slower pace of future rate cuts in 2025 has also added a layer of uncertainty, influencing market sentiment. In this environment the fund has outperformed the relevant index, on the positive side the fund performance benefited from our exposure to the luxury and financial sectors.

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Fund's KID available on our www.sycamore-am.com website.

ESG follow-up, news and dialogue

Dialogue and engagement

Prysmian

We were contacted by Prysmian for feedback on their double materiality assessment. We made recommendations in the following areas: health and safety indicators, circular economy, measures in place to prevent violent behaviour and harassment at work, as well as materiality, the calculation, reporting and definition of scope 3-related targets.

Nvidia

We participated to Nvidia's quarterly Human Rights investor call during which they mentioned they were finishing their Human Right Impact Assessment. However they don't seem to be able to track the end-users (including in conflict areas) of their products at the moment. The company shall publish more elements on this aspect in June 2025.

ESG controversies

Microsoft

In the United States, the Federal Trade Commission is investigating Microsoft in a wide-ranging probe into the company's products, from Cloud to AI, after several cybersecurity incidents involving the group.

Prysmian

The Italian Competition Authority has announced the opening of an antitrust investigation targeting the main manufacturers of copper cables operating in Italy. The investigation was prompted by a leniency application submitted by one of the involved companies. These companies had allegedly coordinated pricing practices, aligning list prices and initial distributor discounts since 2005.
