Investment strategy

Sycomore Sélection Responsable (Luxembourg) is a feeder fund for the Paris-based Sycomore Sélection Responsable master fund. The strategy aims to outperform the Euro Stoxx Total Return Index (dividends reinvested) over a recommended investment horizon of five years.

The fund invests in a selection of stocks that are principally issued by Eurozone companies. Stock picking is carried out based on fundamental analysis and in-depth ESG (Environment, Social, Governance) research designed to identify companies that are addressing the challenges of sustainable development.

Performance as of 30.01.2026

Fund commentary

Eurozone equity markets continued to rise, hitting new highs despite the concerns caused by the geopolitical environment. This optimism, which stems from the prospect of Eurozone companies generating earnings growth in 2026 (after three flat years), was accentuated when the earnings season kicked off. Our fund continues to focus on these growth stocks (notably semiconductor equipment companies, defence players, electrification and luxury companies). Conversely, the sharp rerating posted by Value stocks in 2025 is prompting us to be more cautious and selective, notably within the financial industry. In keeping with this positioning, we initiated a new position in ASMi and strengthened our holdings in Hermès, l'Oréal and Safran. In contrast, Novo Nordisk was removed the portfolio after the stocks' recent rebound.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

	Fund	Index
SPICE	3.7/5	3.6/5
S score	3.5/5	3.4/5

Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.** The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes. All indicators mentioned are calculated on the invested portfolio (excluding cash, derivatives, and mutual funds).

sycomore sélection responsable (luxembourg)

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 22%

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

We engaged with Renault as part of the "Fair Transition" initiative. We presented our engagement initiative. The group is keen to receive feedback on the interest shown by investors on ESG issues concerning Renault. The company also underscored the difficulties experienced with MSCI, which is flagging up more controversies for Renault than for its competitors.

Iberdrola

We met with Iberdrola's management team to discuss ESG issues. The topics raised included water management, the company's installed capacity, and the reduction of scope 3 emissions.
