Investment strategy

Sycomore Sélection Responsable (Luxembourg) is a feeder fund for the Paris-based Sycomore Sélection Responsable master fund. The strategy aims to outperform the Euro Stoxx Total Return Index (dividends reinvested) over a recommended investment horizon of five years.

The fund invests in a selection of stocks that are principally issued by Eurozone companies. Stock picking is carried out based on fundamental analysis and in-depth ESG (Environment, Social, Governance) research designed to identify companies that are addressing the challenges of sustainable development.

Fund commentary

In October, Eurozone equity markets suffered from rising bond yields - rather unexpected considering the region's weak macroeconomic data but driven by tensions on US bond yields, owing to the strength of the US economy and the growing likelihood of Trump winning the next election. Though generally higher than expected, third quarter earnings failed to offset this pressure and left investors with a bitter taste, in view of the large number of downward guidance revisions. In this environment, the fund closed the month in slight negative territory despite the robust earnings posted by some of our strongest convictions (Renault in the auto sector, Societe Generale in banking, Assa Abloy and Saint-Gobain in construction, and Hermès in luxury, recently strengthened at the expense of LVMH). Conversely, ASML and Michelin detracted from performance despite our earlier decision to trim the fund's exposure to both positions.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.6/5
S score	3.6/5	3.3/5
P score	3.8/5	3.7/5
I score	3.8/5	3.7/5

Environmental analysis

Net Environmental Contribution (NEC) **

Degré d'alignement des modèles économiques avec la transition écologique, intégrant biodiversité et climat, sur une échelle de -100%, pour éco-obstruction, à +100%, pour éco-solution, où le 0% correspond à l'impact environnemental moyen de l'économie mondiale. Les résultats sont exprimés en scores de NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données des années 2018 à 2021.
Coverage rate : fund 100% / index 98%

European taxonomy

Percentage of revenues derived from eligible activities to the EU taxonomy

Coverage rate : fund 100% / index 99%

Temperature rising - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.

Coverage rate : fund 99%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.

Coverage rate : fund 97% / index 99%

	Fund	Index
kg. eq. CO ₂ /year/k€	139	194

Fossil fuel exposure

Percentage of income derived from the three fossil energies.

Biodiversity footprint

Artificialised surface area in m² MSA per k€ invested***, measured by the Corporate Biodiversity Footprint. Mean Species Abundance (MSA) is assessed in comparison with the original state of the environment.

Coverage rate : fund 100% / index 97%

	Fund	Index

Sycomore AM does not guarantee the accuracy, completeness, and exhaustiveness of the extra-financial reports.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 15%

ESG follow-up, news and dialogue

Dialogue and engagement

Sanofi

Since 2023, Sanofi has adopted the Fair Wage Network's methodology . When releasing its Q3 earnings, the group announced it will extend its commitment advocating for living wages across key supply chain partners. This addresses a recommendation we had expressed to the company a few months ago. We will have a dialogue with the company next month to better understand commitments in order to protect jobs at Opella, the consumer division to be partially sold to CD&R.

Intesa San Paolo

We had an insightful and reassuring discussion with Intesa San Paolo on how the group manages reorganisation and business evolution from a human capital perspective. We recently learned that Intesa plans up to 3,000 voluntary early staff exits. The proposal would allow bank employees that qualify for pension by the end of 2028 within the framework of the solidarity fund implemented by the banking sector in Italy to early retire.

ESG controversies
