Investment strategy

Sycomore Sélection Responsable (Luxembourg) is a feeder fund for the Paris-based Sycomore Sélection Responsable master fund. The strategy aims to outperform the Euro Stoxx Total Return Index (dividends reinvested) over a recommended investment horizon of five years.

The fund invests in a selection of stocks that are principally issued by Eurozone companies. Stock picking is carried out based on fundamental analysis and in-depth ESG (Environment, Social, Governance) research designed to identify companies that are addressing the challenges of sustainable development.

Fund commentary

In June, Eurozone equity markets closed the month relatively stable, despite rising geopolitical tensions in the Middle East and the uncertainty created by the US President which is affecting the outlook for global economic growth. In this environment, the response from European member states (announced rise in defence spending, approval of a stimulus plan to boost investment in Germany, headway made on the Savings & Investments Union...) has strengthened the change of narrative on the region and gives reasons to hope for an economic recovery over the next few quarters. After a first half during which defensive and/or domestic sectors outperformed (telecoms, utilities, insurance, banks...), the absolute and relative valuations of cyclical and exporting companies now seem to be offering attractive opportunities for H2, notably if a "dark" scenario on US tariffs can be avoided. As a result, their weightings within the portfolio were strengthened during the month (Schneider, Smurfit Westrock, Airbus...).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

BNP Paribas

We engaged BNP Paribas on issues relating to human capital, and notably corporate culture, talent acquisition and retention, equity and headcount growth.

Saint-Gobain

We discussed Saint-Gobain's preference for aligning with the CS3D reporting standards rather than the French vigilance plan. We also informed the company that several items relating to the monitoring and audits of the corrective measures policy were missing. As far as war zones are concerned, Saint-Gobain has implemented a strengthened due-diligence policy, however, in Russia, controls on reporting are minimal owing to the conflict, hindering accountability on several aspects.
