Investment strategy

Sycomore Sélection Responsable (Luxembourg) is a feeder fund for the Paris-based Sycomore Sélection Responsable master fund. The strategy aims to outperform the Euro Stoxx Total Return Index (dividends reinvested) over a recommended investment horizon of five years.

The fund invests in a selection of stocks that are principally issued by Eurozone companies. Stock picking is carried out based on fundamental analysis and in-depth ESG (Environment, Social, Governance) research designed to identify companies that are addressing the challenges of sustainable development.

Fund commentary

Eurozone equity markets rose to historical highs during the month, supported by attractive valuations (notably relative to their US counterparts) and by a positive earnings momentum heightened by currency effects and by the annual earnings season, which got off to a strong start. Top performers in January included banks (slightly overweight in the portfolio since we introduced Unicredit last November) and the luxury sector (driven by the two-digit sales growth reported by Richemont and Brunello Cucinelli in the fourth quarter - two of the fund's convictions at the start of 2025). In terms of portfolio activity, we initiated new positions in Richemont and SAP ahead of their earnings publications (which confirmed the financial health of both companies) and trimmed our positions in Renault, Hermès and Legrand.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

Dialogue and engagement

Iberdrola

Our discussions with Iberdrola focused on environmental issues (physical risks, climate strategy, biodiversity...) as well as the international context - notably following the election of Trump as the new President of the United States.

Allianz

We had an insightful call on human capital with Allianz's Head of IR. It seems the company is really trying to be consistent in its approach and strives to be a good employer. This is supported by key actions and KPIs such as the employees' annual surveys giving employees the opportunity to share feedback on a wide array of aspects and included in any managers' remuneration. We recommend that Allianz develop a more formalized approach on how it prepares its workforce to AI and new technologies.
