Investment strategy

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis
Sycomore Sélection Crédit (Luxembourg) is a feeder of Sycomore Sélection Crédit. Sycomore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process.

Fund commentary

Monetary policies took a rather more restrictive turn in September after the Fed and the ECB raised their key rates by 25 bp. These decisions came with very firm statements on inflation, which is gathering speed. Long-term rates across developed countries - and specifically their 'real' component as inflation has remained rather stable - continued to rise. Yields on 10-year German bonds are close to 3.60%, up 25 bp during the month. The OAT-Bund spread widened by 30 bp over the period, although discussions over the budget in France have only just begun. In this volatile environment, spreads are widening: spreads on Investment Grade bonds have widened by a dozen bp, within the BB segment, spreads have risen by around 30 bp with yields now close to 5.40%. Primary markets remained active and dynamic throughout the month. We took part in the issuances by Sysco (US leader in food supply chains) and Intertek, the certification specialist.

This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies' effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.
A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.
For more details, our annual SRI report is available in our ESG documentation.

No significant exposure :	**56%**	*% of companies with no exposure (neutral)*
Non-alignment :	**2%**	*% of companies misaligned or strongly misaligned*

ESG follow-up, news and dialogue

Dialogue and engagement

Clariane
We questioned Clariane over the system used to verify the data feedback from employees, which is then cross-referenced using several sources based on audits. Clariane has also developed a training system for its care home managers via its corporate university. The training is designed to help managers embrace and embody the group's core values and ultimately improve the quality of care.

ESG controversies

Imerys
Imerys is alleged to have discharged over 3,000 litres of chemicals close to a natural reserve in Brittany in 2021. An investigation is currently underway.

Veolia
The Basque Country Community and Suez Eau Gaz were charged for the illicit discharge of wastewater into the Atlantic Ocean since 2017.
