Investment strategy

A responsible and opportunistic selection of European bonds based on proprietary ESG analysis

Sycomore Sélection Crédit (Luxembourg) is a feeder of Sycomore Sélection Crédit. Sycomore Sélection Crédit aims to deliver financial returns above those of the Bloomberg Euro Aggregate Corporate Ex-Financials TR over a minimum investment horizon of five years, within a modified duration range of 0 to +5, by applying a socially responsible investment process. The fund also aims to outperform its benchmark on the Net Environmental Contribution (NEC) indicator and on the 3-year headcount variation indicator, to select durable companies, particularly on environmental and/or contribution to employment criteria.

Fund commentary

The dollar continued to decline amid geopolitical and trade tensions between the United States and the rest of the world. German sovereign yields remained stable across all maturities. The France vs. Germany bond spread returned to levels observed before the French National Assembly was dissolved, now that the budget has finally been adopted. Credit spreads contracted across all bond segments, despite an extremely dynamic primary market. The risk premium on BB-rated bonds has narrowed by around 10 bp. Vossloh is a leading company specialising in rail infrastructure: rail fastening systems, concrete sleepers, switch systems... This German company issued an unrated hybrid bond callable in 5 years and offering a coupon rate of 5.375% to redeem an earlier issuance and strengthen its capital structure. Belden, a US company specialising in the manufacture of networking, connectivity and cable products refinanced its short-term debt with the issuance of a 7-year bond rated BB- and offering a coupon rate of 4.25%.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

Cellnex

We engaged with Cellnex, which is about to unveil its new 2025-2030 roadmap. Diversity is not a priority in the new plan, despite the implementation of several initiatives. AI has been identified as a new opportunity as it generates more need for towers. The company is now allocating more resources to tower maintenance using drones, which also help lower its accident risk.

Eramet

We discussed ESG issues with Eramet (climate strategy, controversies around Weda Bay and focus areas for new CEO). There is no news at this stage on the production of nickel in Indonesia. The financing strategy has not changed to date, and Eramet is not considering other refinancing options.

ESG controversies

Verizon

Verizon is facing a regulatory probe into its diversity programmes under the US False Claims Act.
