Investment strategy

A selection of growth securities with a positive societal impact

Sycamore Social Impact is a Eurozone equity fund that focuses on companies of any size that offer solutions to global societal challenges, and that have embedded this pursuit of positive impacts into their strategy to deliver profitable and sustainable growth. The fund aims to outperform the benchmark, the Euro Stoxx Total Return index, through a socially responsible investment process. Stock selection is based on our proprietary SPICE methodology, notably on the societal contribution of products & services indicator.

Fund commentary

Euro zone equity markets delivered a muted performance in the month of November, negatively impacted by the implications from US elections on Europe as well as by political uncertainty. In this context, the fund consolidated its advantage relative to benchmark, with a muted effect from stock picking and sector allocation. Among the most relevant contributors, Deutsche Telekom was supported by a Capital Markets Day focused on its strategy driving customer wins and retention and delivering best in class EBITDA growth, coupled with attractive shareholder returns. Saint-Gobain reconfirmed its confidence in the structural changes to culture and performance focus of the group, driving better margins and cash generation. On the negative side, some of the pharmaceutical holdings such as Merck, Sanofi and Rovi suffered from the uncertainty around the measures and future policy of the Trump's administration on the sector.

Country breakdown

Market cap breakdown

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.8/5	3.5/5
S score	3.7/5	3.3/5
P score	3.9/5	3.7/5
I score	3.8/5	3.7/5

Societal and social analysis

Societal contribution **

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 98%

Pillar breakdown

Gender equality ♀/♂

Percentage of women in total company headcounts and executive committees.

Staff coverage rate : fund 97% / index 91%

ExecComm coverage rate : fund 100% / index 96%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 100% / index 99%

The Good Jobs Rating

Degree to which companies contribute to the creation of sustainable and quality jobs, accessible to the greatest number, particularly in regions, countries or territories most in need.

Coverage rate : fund 100% / index 91%

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 100% / index 98%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

■ Coal ■ Oil ■ Gas

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.***.

Coverage rate : fund 96% / index 99%

	Fund	Index
kg. eq. CO ₂ /year/k€	890	761

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 10%

ESG follow-up, news and dialogue

Dialogue and engagement

Renault

During our talks with management, we addressed the difficulty, for car manufacturers, to attain the CAFE standards in 2025 (emissions criteria for CO2/km/vehicle sold) in light of weak sales within the EV segment. To avoid being fined, car manufacturers may have to lower the price of EVs and/or cut their production of combustion-engine cars, and/or purchase carbon credits from US or Chinese car industry players.

ESG controversies

Michelin

Our talks with Michelin focused on the management of site closures in Cholet and Vannes. In our view, Michelin is managing this restructuring very responsibly, providing individual support services to all employees (psychological, financial, training and/or re-skilling) and has committed to recreating at least the same number of jobs locally.

Votes

0 / 0 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
