Investment strategy

Sycamore Next Generation is a flexible, multi-asset SRI fund that combines Sycamore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

As political uncertainty rises, fears of inflationary pressure caused by Trump's political agenda - confirmed by the poor inflation figures in the US - are gradually turning into concerns over economic growth, as suggested by declining consumer confidence and the rising Euro. Long-term rates fell by around 10 bp in Europe. France's risk premium also dipped slightly. Company earnings publications provided evidence of their resilience amid a weak macroeconomic environment. The financial sector, banks in particular, delivered robust performances. The steepening yield curve has also become more favourable. The fund's equity exposure has been raised since the beginning of the year, to benefit from rising markets. The corporate bond envelope also contributed to performance, principally via the carry yield.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 90% / index 98%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 72%

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Carbon intensity**

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI. Intensity allocated pro rata to sales.

Coverage rate : fund 100%

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 96% / index 98%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%. **The fund has committed to outperforming the Euro Stoxx on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 26%

ESG follow-up, news and dialogue

Dialogue and engagement

Allianz

We discussed human capital issues with Allianz. We recommend that Allianz develop a more formalized approach and communicate on how it intends to use new technologies and artificial intelligence across the Group's different divisions and on its plans to support and train its workforce.

ESG controversies

Veolia

A dispute with Veolia over the non-recognition of members of the Unite trade union in the UK has led to industrial action.

Apple

The French Human rights league has filed a lawsuit against Apple alleging user privacy breaches and illicit monetisation of personal data via its Siri assistant. Apple has already been targeted by similar class actions in the US but has always denied these allegations and claims personal data is only used to improve its services. Nevertheless, the company has offered to pay \$95m to end the lawsuits in the US. This is not an isolated case: Google is facing a similar legal action.

Votes

2 / 2 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
