Investment strategy

Sycamore Next Generation is a flexible, multi-asset SRI fund that combines Sycamore's proven expertise in responsible stock and bond picking and international asset allocation, to achieve performance and diversification. The fund's investment process draws from a thorough fundamental analysis, combined with the ESG analysis of companies and countries, with an additional macroeconomic overlay. Managed actively, the fund's exposure to equities (0-50%) and fixed income (0-100%) - including corporate and sovereign debt - is designed to enhance its risk-return profile, to achieve steady capital growth. Employing a multi-themed SRI approach, the fund seeks to invest in companies addressing social, environmental, and technological challenges as highlighted by the United Nations' Sustainable Development Goals, for the generations to come.

Fund commentary

Central banks continued to dominate the market narrative and are about to initiate a rate cutting cycle. US economic data is pointing towards a slowdown in growth, but growth nonetheless, as the country enters a presidential election year. Defensive sectors (pharmacy, telecoms) got off to a strong start and were later joined by ASML and LVMH, after both companies surprised positively in their earnings publications. The US technology sector continued to rally, including investee companies Alphabet, Microsoft and Salesforce. Our exposure to Japan (Nintendo, Advantest) also delivered positive returns. The bond envelope accounts for 55% of net assets and contributed positively to the fund's performance, corporate hybrid bonds, in particular, posted strong gains.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

ESG follow-up, news and dialogue

Dialogue and engagement

STMicroelectronics

We asked STMicroelectronics to provide more transparent information on weightings, trigger points, targets and achievements on its criteria relating to short and long-term executive remuneration. We notably encouraged the company to assemble information on the annual ESG criteria achievement ratios within the proxy.

SAP

We discussed the restructuring plan announced on January 24th by the company. Out of the 8,000 jobs likely to be affected, SAP expects that two thirds will benefit from internal mobility or reskilling plans. The company's reasoning, based on having "the right skills at the right place", has not been followed so far with sufficiently detailed KPIs on training budgets and productivity, we feel.

ESG controversies

SAP

SAP has agreed to pay \$230 million to settle a bribery case that took place in South Africa in 2018. This agreement enables SAP to avoid prosecution on the condition that the group does not commit a similar offence over the next three years. The company had already provisioned over \$170 million for this dispute, cooperated with the authorities, and taken satisfactory remedial measures – including strengthening the teams dedicated to compliance issues.
