### Investment strategy

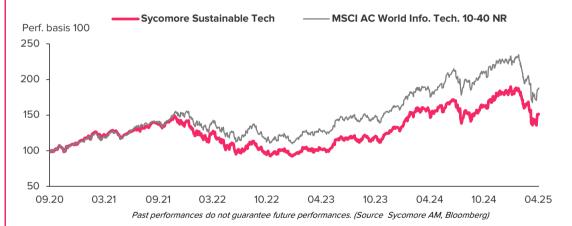

### A selection of global responsible technology players

France

Sycomore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3-"Improvement Enablers": companies engaged in making progress in the two previous dimensions.

### **Fund commentary**

Volatility followed Liberation Day, but markets recovered in late April. At the time of writing, the fund is down for the month but continues to outperform its benchmark in 2025. Stock selection drove outperformance in the month: small-cap Asia names (Hanmi Semi, Wiwynn, Asia Vital Components) led gains, while our semis sleeve (Micron, Nvidia, Broadcom) detracted. Despite a lack of strong conviction view on the market's direction in the near-term, we believe technology can outperform global markets. We base this on two points: Global Technology stocks trade at decade-low relative valuations versus the MSCI ACWI, and EPS revisions have outperformed broader indices YTD. We remind our partners that approximately 35% of the sector is Software & Services, which is tariff-insulated and consists of longer-cycle, more resilient businesses. With software valuations at their lowest versus the ACWI in over six years. With that view, we increased our software exposure in April. Also important in making the case for tech outperformance from here, direct Al beneficiaries account for over 30% of our benchmark (>35% of our fund). Absent a deep recession, growing enterprise and consumer Al adoption through 2025 should sustain strong demand for Al infrastructure.

### Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environnemental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.
