Investment strategy

A selection of global responsible technology players

Sycamore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3-"Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Performance as of 28.06.2024

Fund commentary

June was a continuation of strong performance for the technology sector, driven by large cap outperforming the rest by a wide margin. Our semiconductor investments continued to outperform and were up double-digit percent in June, driven by Nvidia, Micron, and Broadcom, while our software pick continued to lag behind. Procure, MongoDB, Confluent continued to underperform in June but have started to show investor interest over the last ten days or so keeping us optimistic that we will see at least a partial reversal towards software vs. semis. Overall, we remain optimistic on end-market demand for tech as we believe enterprise tech budget are slowly, but surely unlocking. On the AI front, our conversations continue to indicate strong spend by hyperscalers, which should be particularly strong in Q4 of this year and Q1 of next year with the GB200 ramp. Hence, despite taking some profit in Nvidia earlier in the month, we remain very optimistic about the upside for the company and its ecosystem into the back half of the year.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.5/5
S score	3.4/5	2.8/5
P score	3.5/5	3.1/5

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of the economic models with the ecological transition, integrating biodiversity and climate, on a scale running from -100% for eco-obstruction to +100% for eco-solution, where 0% equates to the average environmental impact of the global economy. The results are expressed in NEC 1.0 (nec-initiative.org) calculés par Sycomore AM sur la base de données des années 2018 à 2021.

Coverage rate : fund 100% / index 93%

Temperature rising - SB2A

Induced average temperature increase by 2100 compared to pre-industrial times, according to the Science-Based 2°C Alignment methodology.

Coverage rate : fund 58%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested***.

Coverage rate : fund 99% / index 99%

The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included.

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 4%

ESG follow-up, news and dialogue

Dialogue and engagement

Nvidia

We met with Nvidia concerning its ongoing Human Rights impact assessment and engaged with the company to report concrete examples and difficulties in human rights risk assessment. We will follow-up with Nvidia later in 2024.

GitLab

Prior to its AGM, to enhance shareholder rights, we initiated an engagement with Gitlab to remove the dual-class capital structure and the classified board structure. Concerning executive remuneration, we asked Gitlab to increase transparency on criteria, targets, weights, threshold, maximum and achievements, to condition CEO long-term awards on the achievement of performance criteria, and to include environmental and social KPIs in CEO variable remuneration.

ESG controversies

Microsoft

Microsoft continued to face criticism over its employment practices allegedly involving coercive state labor transfers in its supply chain that may pose human rights violations against ethnic minorities in the Xinjiang Uyghur Autonomous Region. We contacted Microsoft on the materiality of forced labour in the supply chain back in April 2021. Microsoft underlined its commitment to ethical sourcing and human rights. Its Supplier Code of Conduct bans forced labor, and audits have shown no evidence of such practices among their suppliers. Since September 2020, Microsoft has enhanced its efforts to detect forced labor risks, particularly from the Xinjiang region, by implementing self-reporting mechanisms and thorough risk screenings during supplier onboarding and continued compliance checks.

Votes

15 / 15 voted general assemblies over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

ESG commentary

Prior to Duolingo AGM we communicated areas of improvements concerning executive remuneration. We encouraged the company to disclose CEO STI and LTI targets as well as a sufficient compensation clawback policy and stock ownership guidelines for executives. We also asked Duolingo to include environmental and social KPIs in CEO variable (annual bonus and long-term incentive) remuneration and to adopt a formal performance bonus and LTIP with pre-set metrics and goals for other NEOs' equity awards.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
