Investment strategy

A selection of global responsible technology players
Sycomore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3-"Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Fund commentary

September was a strong month for technology and for the fund in absolute terms, although we underperformed the benchmark. Semiconductors led our performance, with Eugenetec our largest positive contributor, alongside Nebius, TSMC, Onto Innovation and MediaTek. In relative terms, this was more than offset by Baidu, Broadcom and MongoDB, while our underweight in hardware also weighed on results. Looking ahead, we remain constructive on the AI buildout. The focus, however, is shifting to execution. Continued monetization by the leading AI labs, particularly OpenAI and Anthropic, will be critical over the coming months.

The labels aim to guide investors in identifying sustainable and responsible investments. The composition of the management team is subject to change without notice. Before investing, first consult the Funds KID available on our www.sycomore-am.com website. Sustainable investments may have negative impacts on certain ESG factors. Sustainable development goals exposure

This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies' effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.
A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.
For more details, our annual SRI report is available in our ESG documentation.

No significant exposure :	**63%**	*% of companies with no exposure (neutral)*
Non-alignment :	**0%**	*% of companies misaligned or strongly misaligned*

ESG follow-up, news and dialogue

Dialogue and engagement

GDS/Baidu/Freee KK
As part of the SRI Label requirements, we engaged with several companies to encourage the disclosure of the CEO pay ratio – an indicator that measures the discrepancy in pay between the CEO and the company's employees. The companies we engaged with responded positively and are willing to work on the issue with a view to reporting the figure shortly.

ESG controversies

Microsoft
In Spain, allegations have been made over asbestos-related risks and improper disposal of waste during the construction of a data center.
