Investment strategy

A selection of global responsible technology players

Sycamore Sustainable Tech invests in technology companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3-"Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Performance as of 30.06.2026

Fund commentary

The technology sector continued to show dispersion in June, with semiconductors delivering positive returns while software remained under pressure. The fund had a strong month, significantly outperforming its benchmark, driven by solid stock selection across both segments. In software, Nebius, MongoDB, Varonis and Synopsys were key contributors. In semiconductors, our conviction in semicap equipment paid off, with Applied Materials, KLA and ASML driving performance. We remain constructive on semicap as our preferred theme for the second half of 2026. We also see scope for a rebound in China AI, which has been a meaningful drag on performance both in June and year-to-date.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

	Fund	Index
SPICE	3.5/5	3.4/5
S score	3.3/5	3.1/5
P score	3.5/5	3.3/5
I score	3.7/5	3.7/5

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 93% / index 90%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 100% / index 99%

Carbon intensity of sales

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.

Coverage rate : fund 92% / index 98%

	Fund	Index
kg. eq. CO ₂ /k€	468	375

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by MSCI.

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale of -100% to +100%, calculated by Sycomore AM and based on information from the years 2021 to 2024.

Coverage rate : fund 100% / index 93%

CEO Pay Ratio**

Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Coverage rate : fund 88% / index 94%

Staff growth**

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 91% / index 95%

Human rights policy

Percentage of portfolio companies that have drawn up a Human Rights policy.

Coverage rate : fund 89% / index 74%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Target, Moody's and MSCI. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.** The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes. All indicators mentioned are calculated on the invested portfolio (excluding cash, derivatives, and mutual funds).

Sustainable development goals exposure

This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.

A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.

For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 71% % of companies with no exposure (neutral)
Non-alignment : 0% % of companies misaligned or strongly misaligned

ESG follow-up, news and dialogue

Dialogue and engagement

Mediatek

We have engaged with MediaTek: the management team highlighted its role as an AI enabler across cloud-to-edge applications. While fundamental human rights commitments and security-by-design features are in place, AI governance remains at an early stage, lacking a dedicated Responsible AI framework, structured risk assessment processes, and clear safeguards for sensitive use cases such as biometrics. We encourage further formalisation of AI oversight and due diligence practices.

ESG controversies

Microsoft

Microsoft faced two concurrent controversies this month. First, users reportedly experienced loading and timeout issues with the Copilot AI productivity tool, prompting an internal investigation into product reliability. Second, Activision shareholders reached a USD 250 million settlement related to alleged fiduciary duty breaches surrounding Microsoft's acquisition of the video game publisher. Together, these issues raise operational and governance concerns.

SK Hynix

SK hynix faced a health and safety controversy after a hydrogen fluoride gas leak at a semiconductor manufacturing facility in South Korea reportedly injured six workers following a fire that was subsequently contained. The incident highlights the operational and occupational safety risks associated with handling hazardous chemicals in advanced semiconductor production environments.

Votes

8 / 8 voted general assemblies over the month.
 Details on our votes are available here the day following the company's AGM [Here](#).

ESG commentary

During the month of June, we took the opportunity to communicate our recommendations to companies, taking advantage of the AGM period.

Additional disclaimers: although the fund's performances are partly driven by the ESG indicators of portfolio holdings, these are not the sole determining factor. Marketing communication.
