Investment strategy

A selection of global responsible technology players

Sycamore Sustainable Tech invests in technology regional companies listed on international markets and employs an innovative SRI process. Stocks are selected with no regional or market capitalisation constraints. The ESG approach focuses on three dimensions: 1- "Tech for Good": for goods and services with positive social or environmental impacts; 2- "Good in Tech": for a responsible use of goods and services that will reduce negative externalities impacting individuals or the environment; 3- "Improvement Enablers": companies engaged in making progress in the two previous dimensions.

Performance as of 29.08.2025

Fund commentary

August was a slightly more volatile month driven by low liquidity, high retail investor participation and the tail end of the technology earnings season. Technology was down slightly on the month, with semiconductors continuing to outperform. Important to note that AI-semis underperformed in August with analog/industrial semis posting solid mid to high single digit gains. Our fund mostly tracked the benchmark, with some volatility in our software sleeve (MongoDB strong positive results driving a near 40% positive move on earnings day, while Monday.com implicit guide lower saw shares fall ~30% on earnings). We continue to see good risk/reward in technology going into the rest of the year. The sector median trades at a 7 + year low P/E relative to global equities, which we see as unwarranted. Within tech we have a current preference for the software sub-sector over semiconductors and the fund is positioned as such.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.6/5	3.4/5
S score	3.3/5	3.0/5
P score	3.6/5	3.3/5
I score	3.8/5	3.7/5
C score	3.8/5	3.4/5
E score	3.2/5	3.2/5

Environmental analysis

Net Environmental Contribution (NEC)

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the [\(nec-initiative.org\)](#) based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Coverage rate : fund 94% / index 90%

European taxonomy

Share of EU taxonomy-aligned company revenues provided by MSCI.

Coverage rate : fund 100% / index 99%

Carbon intensity of sales

Weighted average of annual greenhouse gas emissions (GHG Protocol) from scopes 1, 2, 3 upstream and downstream as modelled by MSCI per annual sales in k€.

Coverage rate : fund 100% / index 97%

	Fund	Index
kg. eq. CO ₂ /k€	252	244

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Societal and social analysis

Societal contribution**

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale of -100% to +100%, calculated by Sycomore AM and based on information from the years 2021 to 2024.

Coverage rate : fund 100% / index 92%

CEO Pay Ratio**

Average ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Coverage rate : fund 94% / index 93%

Human rights policy

Percentage of portfolio companies that have drawn up a Human Rights policy.

Coverage rate : fund 91% / index 77%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 100% / index 96%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes. All indicators mentioned are calculated on the invested portion of the fund (excluding cash, derivatives, and UCITS).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 5%

ESG follow-up, news and dialogue

Dialogue and engagement

Duolingo

As part of our initiative, Tech and Mental health, in late August we have reached out to the company's management to better assess and understand the position of Duolingo and the impact they have on their user's mental health. Our questions mainly focus on the use of AI in their products, the time spent by their customers on the platform, the pressure they can feel with the streaks. And most importantly the AI first strategy of the company.

ESG controversies

Microsoft

HOP (Halt to Planned Obsolescence), a French association, has criticized the end of free updates of Windows 10 by Microsoft – scheduled for October 14th, 2025. This decision would render up to 400 million devices obsolete throughout the world, with users forced to buy a new computer or pay for updates. HOP believes that these early replacements will generate over 70Mt of CO2 globally and heavily impact users.

Votes

0 / 0 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
