Investment strategy

A selection of listed and unlisted European companies supporting the creation of durable, inclusive employment

Sycomore Inclusive Jobs is an inclusive equity fund that invests in companies creating durable, inclusive jobs, according to Sycomore AM's analysis. The fund invests 85 to 95% of its assets in listed European stocks and 5 to 10% in units of FCPR Sycomore Impact Emploi By INCO. The FCPR, managed by INCO Ventures, invests in unlisted companies and associations that are active in creating inclusive employment for people with difficult access to the job market. The main selection metric is the Good Jobs Rating, which employs three key factors to assess a company's contribution towards meeting job-related societal challenges: quantity, quality and geography. The companies in the portfolio must also operate activities aligned with the societal and environmental transitions.

Fund commentary

Uncertainties over the pace of central bank rate cuts have put bond yields under renewed pressure, causing some segments to retreat, notably if their performances are highly correlated with interest rate movements. These include small caps, to which the fund is highly exposed, and which underperformed once more in January. Similarly, renewable energy developers (Neoen, Solaria, EDP Renovaveis) suffered in this environment, while Equasens was hurt by fears of a slowdown in registrations due to the end of the French Ségur healthcare investment programme. Puma fell on the back of underwhelming preliminary results for 2023, with weaker-than-expected earnings and a cautious guidance for 2024. Conversely, ASML stood out as the top contributor to performance with very strong order intake at the end of the year. Danieli, a new position initiated at the beginning of January, outperformed after signing multiple new contracts including innovative projects in green steel.

Dialogue and engagement

STMicroelectronics

We asked STMicroelectronics to provide more transparent information on weightings, trigger points, targets and achievements on its criteria relating to short and long-term executive remuneration. We notably encouraged the company to assemble information on the annual ESG criteria achievement ratios within the proxy.

ESG controversies

Novartis

The U.S. Food and Drug Administration (FDA) has reviewed a TV ad for Kisqali. According to the FDA, overstated representations about Kisqali's efficacy could lead patients with advanced or metastatic breast cancer to believe that Kisqali has been shown to be more effective in treating their condition and symptoms. In the ad, Novartis states that Kisqali enables patients to live longer and helps preserve their quality of life.

Votes

1 / 1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).

Rovi

Management indicated that mid-term, GLP1 could be a major source of growth for the group for its fill and finish activity. This would widen the customer portfolio of the company which is positive. But this could take some time since no agreement has been announced yet with a weight-loss drug operator. Moreover, Rovi would have to receive approvals from the EMA and/or the FDA.
