Investment strategy

A responsible selection of international companies that meet today's social challenges

Sycomore Global Social Impact invests in companies that have a positive impact with regard to social issues, such as those highlighted by the United Nations' Sustainable Development Goals. We are convinced that companies that meet current social challenges are the most likely to generate sustainable operational and financial performance. Stock selection is based on a rigorous fundamental analysis that integrates sustainable development issues with a strong social dimension. This analysis is based on our SPICE model and our proprietary metrics associated with the different stakeholders that make up society (Consumers, Employees and Communities): the Social Contribution, the Happy@Work rating and the Good Jobs Rating. The investment universe is global, with no restrictions on capitalisation size.

Fund commentary

Global equity markets posted positive returns during September, although performance was increasingly driven by movements in bond markets. Against this backdrop, Sycomore Global Social Impact delivered a slightly positive absolute return but underperformed its benchmark. While asset allocation contributed positively to relative performance, stock selection, particularly within Information Technology and Communication Services, weighed on returns. The launch of Meta's new AI application triggered a rally in the parent company of Facebook, which is not investable for us, as well as in other companies exposed to the CPU supply chain where we remain underweight. During the month, we increased risk in the portfolio by focusing on companies whose fundamentals are improving and whose valuations remain attractive.

SPICE*, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts.

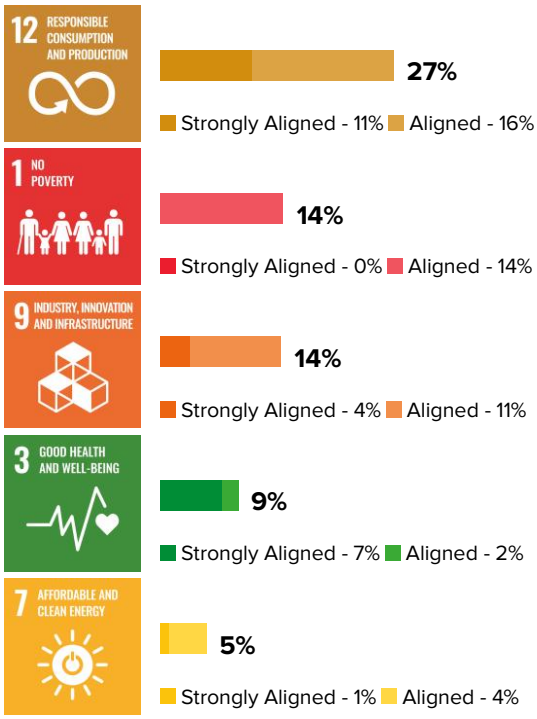
Sustainable development goals exposure



This graph represents the main exposures to the United Nations Sustainable Development Goals. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies' effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics.
A company may be exposed to several SDGs to varying degrees: strongly aligned, aligned, neutral, not aligned, or strongly not aligned. The methodology is based on data provided by MSCI.
For more details, our annual SRI report is available in our ESG documentation.

No significant exposure :	**53%**	*% of companies with no exposure (neutral)*
Non-alignment :	**7%**	*% of companies misaligned or strongly misaligned*

ESG follow-up, news and dialogue

Dialogue and engagement

L'Oréal
We engaged in dialogue as part of the FLAIR coalition on human rights. L'Oréal maintains a stable and robust human rights governance framework, overseen by CSR and reporting to the CEO, with dedicated committees, 50+ experts, and unchanged resources. Reporting will be updated for 2027, refining risk mapping and supplier due diligence, and prioritizing HRIAs beyond Tier 1 suppliers based on risk. A key improvement is enhanced remediation through third-party support for non-compliant suppliers.

ESG controversies

Microsoft
In Spain, allegations have been made over asbestos-related risks and improper disposal of waste during the construction of a data center.
