Investment strategy

A responsible selection of that address today's social challenges.global companies

Sycamore Global Social Impact invests in companies that have a positive impact with regard to social issues, such as those highlighted by the United Nations' Sustainable Development Goals. We are convinced that companies that meet current social challenges are the most likely to generate sustainable operational and financial performance. Stock selection is based on a rigorous fundamental analysis that integrates sustainable development issues with a strong social dimension. This analysis is based on our SPICE model and our proprietary metrics associated with the different stakeholders that make up society (Consumers, Employees and Communities): the Social Contribution, the Happy@Work rating and the Good Jobs Rating. The investment universe is global, with no restrictions on capitalisation size.

Fund commentary

The month of August was characterized by high volatility and dispersion of returns. In this environment the fund underperformed his benchmark due to a combination of 3 main factors 1) stock specific issues – none of them structural post results announcement 2) Broadening of the rally especially in US towards YTD underperforming stocks and thematic that we didn't owned 3) strong value overperformance, the fund has a tilt towards quality/growth. For example, RELX (one of the worst performer in August) have been caught in the sell off an AI loser basket while the results have demonstrated the opposite (growth of the Law division has reaccelerated post implementation of AI), we are reassessing the weight of the stock in the portfolio but we are still positive long term. During the months we used volatility to initiate 2 new positions in Mercadolibre (E-commerce and financial services in Latin America) and Spotify (music streaming services). We believe that a normalization of the market and a decrease in volatility is more likely post tariffs announcement and that in a normalized environment our stock picking will continue to generate alpha.

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.6/5	3.3/5
S score	3.4/5	2.7/5
P score	3.8/5	3.2/5

ESG follow-up, news and dialogue

Dialogue and engagement

Duolingo

As part of our initiative, Tech and Mental health, in late August we have reached out to the company's management to better assess and understand the position of Duolingo and the impact they have on their user's mental health. Our questions mainly focus on the use of AI in their products, the time spent by their customers on the platform, the pressure they can feel with the streaks. And most importantly the AI first strategy of the company.
