### Fund commentary

Euro sovereign rates remained rather stable in November. The risk premiums on French and Italian bonds fell back. Fears of a bubble forming on artificial intelligence caused volatility on risk assets to rise and spreads widened a little during the month. The market expects ECB rates to remain stable over the next few months. In contrast, hopes of rate cuts by the Fed proved volatile, with investors now expecting a rate cut at the December meeting, followed by two further cuts in 2026. The primary market remained dynamic, both within the Investment Grade and High-Yield segments.
