Investment strategy

Sycoyield 2026 is a maturity fund seeking yield opportunities in the bond markets. It invests mainly in high-yield corporate bonds issued in euros, with a maturity date mainly in 2026 and which are intended to be held until their maturity. The selection of issuers takes into account environmental, social and governance issues.

Fund commentary

The dollar continued to rise in the wake of Trump's re-election: his programme is likely to fuel inflation and inhibit the Fed's rate cutting cycle. The depreciation of the euro against the dollar is intensified by expectations of aggressive rate cuts by the ECB in 2025. US long-term yields returned to levels observed at the end of October and Eurozone sovereign yields fell. The French risk premium rose, however, to account for growing political risks. Credit spreads widened slightly on the BBB segment but narrowed in HY. The primary market remained very dynamic as many issuers took advantage of attractive conditions to refinance their debt ahead of maturity.
