Sycovield 2026 is a maturity fund seeking yield opportunities in the bond markets. It invests mainly in high-yield

corporate bonds issued in euros, with a maturity date mainly in 2026 and which are intended to be held until their

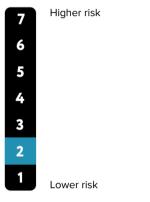

maturity. The selection of issuers takes into account environmental, social and governance issues.

Assets | 317.6 M€

### Fund commentary

The prospect of a trade agreement between the United States and several of its partners, such as Europe and Japan, allowed for a positive market environment in July. In the absence of decisions from central banks, markets are hanging on for the Fed to lower its rates and for the ECB to make its final 25-bp cut. Yield curves continued to steepen amid lower demand for sovereign bonds. In contrast, corporate bonds remain very popular with investors and credit spreads have contracted further. This affected both categories, Investment Grade as well as High Yield. Capital flows from investors were also elevated, clearly supporting corporate bond valuations. The first corporate earnings publications demonstrated the resilience of auto equipment manufacturers, including Forvia and OP Mobility, lifting their bonds during the month. OP Mobility tapped the primary market with a bond that was 10 times over-subscribed, confirming the strength of investor demand at present.
